Excerpt from Social Civics Many excellent textbooks are already available for the teaching of civics Why should another be added to the number Wherein does this book differ from the rest What are its outstanding features The Plan This book covers a wider range than most texts It includes not only a survey of governmental framework and functions but many topics which are ordinarily spoken of as questions in economics sociology and international relations The propriety of including such topics scarcely requires a defensive argument now adays for the old lines of demarcation in the social sciences are rapidly breaking down The problems of our complex modern civilization pay no heed to technical boundaries They are the joint product of political social and economic forces No one can get a grasp of them if he lets his mind run on a single track A well organized course in civics or in the problems of democracy should acquaint the student with the great institutions relations and principles which dominate the life of the community To accomplish this end it should carry him as far afield as need be About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works      **Preparing for Citizenship** William Backus Guitteau, 1913      **Civic Education** David Snedden, 2013-10
