Position Markers

Metal Frets

Neck A one piece removable neck – classically with an integrated maple fingerboard – many Strats now have conventional rosewood fingerboards which are not just harder wearing but also have an effect on the sound – many players insist on the original formula. The 6 wheel screw feature means a 'bent' can take as little as 3 days (see page 105). The original 21 frets are now often augmented to 22.

Tremolo An array of metal rods set in a body that does this with the neck straight. It allows adjustment to compensate for the extra strain of metal strings – the guitar 'settled down' (see string) until the early years of the 21st century. The tremolo system has been required to vary at least the type of nut (see page 106).

Machine Heads Six machine heads aligned in a staggered row – achieving a straight string path – important for stability especially when using vibrato. The iconic headstock has varied, but in the early 21st century the classic has returned. See Specific case studies on page 104.

Pickup Covers

Pickups These single but effective single coil pickups revolutionised the sound of the electric guitar and set the stage for Rock 'n' Roll. A pickup update is simple (see page 103).

Potentiometer Though shown here as components – virtually all the electronics can be removed as one piece for simple replacement. The potentiometer is the heart of the guitar's electronics.

Volume and Tone Switch

Pickup Selector One accessible three-way switch for instant changes of tone colour. Now most commonly a five-way switch and sometimes augmented with FSR, 'SRV', 'Delta tone' and 'SL switching'. See Specific case studies starting on page 104.
