### Factors used to calculate your credit score

#### 30% Used vs. Available Credit

The less you use of your total available credit each month, the better. Your score can suffer if you get close to maxing out all your credit capacity even if you're making payments on time.

#### 35% Payment History

Making payments on time benefits your score.

#### 5-7% Length of Credit History

A longer history of good credit habits improves your score.

#### 10-12% New Credit

Opening new credit cards has a short-term negative effect on your score.

#### 15% Types of Credit

A mix of credit types (credit cards, loans, mortgages, car loans) benefits your score.

**Credit Score Factors**

Financial institutions look at your credit report and credit score to make decisions around lending.

#### <550

A low score means you could be denied a loan or credit card.

#### 550 - 720

You may still qualify for a loan or credit, but you may get charged a higher interest rate.

#### 720+
