The first conference was held in 1986 in Stuttgart Germany and the series continued every four years: 1990 Santander Spain, 1994 Manchester United Kingdom, 1998 Udine Italy, 2002 Paris France, 2006 Graz Austria, 2010 Trondheim Norway, 2014 Delft The Netherlands. The conference provides a forum for exchange of ideas and discussion on topics related to numerical modelling in geotechnical engineering. Both senior and young researchers as well as scientists and engineers from Europe and overseas are invited to attend this conference to share and exchange their knowledge and experiences. This work is the first volume of NUMGE 2018. Sustainability and Financial Services in the Digital Age Nadia Mansour, Lorenzo M. Bujosa Vadel, 2024-10-21 This volume examines how innovation and digital transformation impact the financial and accounting sectors. Featuring selected contributions from the third Finance Accounting and Law in the Digital Age conference 2024 held at the University of Salamanca Spain, the contributions of this book explore the development of digital finance and the complicated equation between financial stability, the security of investors and financial consumers, sustainable finance and support for innovation. Climate change and the exponential growth of technology have built an explosion of financial innovation. The digital revolution has recently reached the financial sector protected by a specific regulatory environment. The volume describes how all areas of finance are now invested by new players who are transforming the banking and financial landscape to create a novel digital ecosystem. *Modernising the People's Liberation Army* James Char, 2024-06-03 This volume examines the progress made by the Chinese military, the People's Liberation Army (PLA), as it strives to meet its commander in chief's directive to transform itself into a more capable fighting force. The book tracks the reforms undertaken by the PLA in meeting its commander in chief's grand objectives set at the 2015 Central Military Commission Reform Work Meeting for China's armed forces to transform themselves into a more professional and modern military. Focusing on those changes since late 2016 at corps level and below, the first and second sections of the volume document the subsequent force structure and operational changes to the PLA's four conventional services and two newly established PLA branches, the Strategic Support Force and Joint Logistic Support Force. To that end, the contributors examine the reforms promulgated by the Chinese high command and measure them against observable developments in the PLA's power projection capabilities. In view of how the instrumentalization of military power is writ large in Beijing's strategic calculus and in regional hotspot issues, the final part of the book also provides pathbreaking insights into two critical but not so well understood phenomena: the now regular PLA aerial activities in the Taiwan Strait and the PLA Navy's submarine operations in the South China Sea. This book will be of much interest to students of East Asian security, Chinese politics and military, and strategic studies in general. *Towards a Competence-Based View on Models and Modeling in Science Education* Annette Upmeyer zu Belzen, Dirk Krüger, Jan van Driel, 2020-01-01 The book takes a closer
