The Age of Wonder Richard

Holmes,2009-07-14 The Age of Wonder is a colorful and utterly absorbing history of the men and women whose discoveries and inventions at the end of the eighteenth century gave birth to the Romantic Age of Science When young Joseph Banks stepped onto a Tahitian beach in 1769 he hoped to discover Paradise Inspired by the scientific ferment sweeping through Britain the botanist had sailed with Captain Cook in search of new worlds Other voyages of discovery astronomical chemical poetical philosophical swiftly follow in Richard Holmes s thrilling evocation of the second scientific revolution Through the lives of William Herschel and his sister Caroline who forever changed the public conception of the solar system of Humphry Davy whose near suicidal gas experiments revolutionized chemistry and of the great Romantic writers from Mary Shelley to Coleridge and Keats who were inspired by the scientific breakthroughs of their day Holmes brings to life the era in which we first realized both the awe inspiring and the frightening possibilities of science an era whose consequences are with us still

Crop Adaptation to Climate Change Shyam Singh

Yadav,Robert J. Redden,Jerry L. Hatfield,Hermann Lotze-Campen,Anthony E. Hall,2011-08-02 A major task of our time is to ensure adequate food supplies for the world s current population now nearing 7 billion in a sustainable way while protecting the vital functions and biological diversity of the global environment The task of providing for a growing population is likely to be even more difficult in view of actual and potential changes in climatic conditions due to global warming and as the population continues to grow Current projections suggest that the world s temperatures will rise 1 8 4 0 by 2100 and population may reach 8 billion by the year 2025 and some 9 billion by mid century after which it may stabilize This book addresses these critical issues by presenting the science needed not only to understand climate change effects on crops but also to adapt current agricultural systems particularly in regard to genetics to the changing conditions Crop Adaptation to Climate Change covers a spectrum of issues related to both crops and climatic conditions The first two sections provide a foundation on the factors involved in climate stress assessing current climate change by region and covering crop physiological responses to these changes The third and final section contains chapters focused on specific crops and the current research to improve their genetic adaptation to climate change Written by an international team of authors Crop Adaptation to Climate Change is a timely look at the potentially serious consequences of climate change for our global food supply and is an essential resource for academics researchers and professionals in the fields of crop science agronomy plant physiology and molecular biology crop consultants and breeders as well as climate and food scientists
