Bearing Yhwh's Name at Sinai Carmen Joy Imes, 2023-06-21 The Name Command NC is usually interpreted as a prohibition against speaking Yhwh's name in a particular context false oaths wrongful pronunciation irreverent worship magical practices cursing false teaching and the like However the NC lacks the contextual specification needed to support the command as speech related Taking seriously the narrative context at Sinai and the closest lexical parallels a different picture emerges one animated by concrete rituals and their associated metaphorical concepts The unique phrase *ns shm* is one of several expressions arising from the conceptual metaphor election as branding that finds analogies in high priest regalia as well as in various ways of claiming ownership in the Ancient Near East such as inscribed monuments the use of seals and the branding of slaves The NC presupposes that Yhwh has claimed Israel by placing Yhwh's own name on her In this light the first two commands of the Decalogue reinforce the two sides of the covenant declaration I will be your God you will be my people The first expresses the demand for exclusive worship and the second calls for proper representation As a consequence the NC invites a richer exploration of what it means to be a people in covenant with Yhwh a people bearing his name among the nations It also points to what is at stake when Israel carries that name in vain The image of bearing Yhwh's name offers a rich source for theological and ethical reflection that cannot be conveyed nonmetaphorically without distortion or loss of meaning

Nuclear Power David Elliott, 2017-05-02 This book looks at the early history of nuclear power at what happened next and at its longer term prospects The main question is can nuclear power overcome the problems that have emerged It was once touted as the ultimate energy source freeing

mankind from reliance on dirty expensive fossil energy Sixty years on nuclear only supplies around 11.5% of global energy and is being challenged by cheaper energy options While the costs of renewable sources like wind and solar are falling rapidly nuclear costs have remained stubbornly high Its development has also been slowed by a range of other problems including a spate of major accidents security concerns and the as yet unresolved issue of what to do with the wastes that it produces In response a new generation of nuclear reactors is being developed many of them actually revised versions of the ideas first looked at in the earlier phase Will this new generation of reactors bring nuclear energy to the forefront of energy production in the future
