

1. Potential energy that depends on height is called

- |                                                   |                                                         |
|---------------------------------------------------|---------------------------------------------------------|
| <input type="radio"/> A kinetic energy.           | <input type="radio"/> B gravitational potential energy. |
| <input type="radio"/> C elastic potential energy. | <input type="radio"/> D mechanical energy.              |

2. The rate at which energy is transferred is called

- |                                |                                 |
|--------------------------------|---------------------------------|
| <input type="radio"/> A power. | <input type="radio"/> B work.   |
| <input type="radio"/> C time.  | <input type="radio"/> D joules. |

3. Energy stored in the nucleus of an atom is called

- |                                          |                                                 |
|------------------------------------------|-------------------------------------------------|
| <input type="radio"/> A nuclear energy.  | <input type="radio"/> B mechanical energy.      |
| <input type="radio"/> C chemical energy. | <input type="radio"/> D electromagnetic energy. |

4. The energy associated with motion is called

- |                                                         |                                         |
|---------------------------------------------------------|-----------------------------------------|
| <input type="radio"/> A elastic potential energy.       | <input type="radio"/> B nuclear energy. |
| <input type="radio"/> C gravitational potential energy. | <input type="radio"/> D kinetic energy. |

5. Unlike kinetic energy, potential energy is

- |                                           |                                    |
|-------------------------------------------|------------------------------------|
| <input type="radio"/> A not measurable.   | <input type="radio"/> B conserved. |
| <input type="radio"/> C energy of motion. | <input type="radio"/> D stored.    |

6. Visible light is an example of

- |                                                 |                                            |
|-------------------------------------------------|--------------------------------------------|
| <input type="radio"/> A chemical energy.        | <input type="radio"/> B electrical energy. |
| <input type="radio"/> C electromagnetic energy. | <input type="radio"/> D nuclear energy.    |

7. Moving water can be used to produce electricity because
