ICTES 2018 Robbi Rahim, Kadek Suranata, Ildil Ildil, Itsar Bolo Rangka, 2019-03-13 The technical program of The First ICTES 2018 consisted of 114 full papers. Aside from the high quality technical paper presentations we also held workshop and clinic manuscript that was carried out before the main track aims to strengthen the ability to write scientific publications. Coordination with the steering chairs Dr Kadek Suranata S Pd M Pd Kons and the members of organizing committee is essential for the success of the conference. We sincerely appreciate all the Advisory Boards for the constant support and guidance. It was also a great pleasure to work with such an excellent organizing committee team for their hard work in organizing and supporting the conference. In particular the Scientific Committee led by Cand Dr Robbi Rahim M Kom have completed the peer review process of technical papers and made a high quality technical program. We are also grateful to Students Conference chairs were leading by Ida Ayu Made Diah Paramiswari for their support and all the authors who submitted their papers to the First ICTES 2018. We strongly believe that ICTES conference provides a good forum for all academicians, researchers and practitioners to discuss all Educational science and technology aspects that are relevant to issues and challenge for sustainability in the 4th industrial revolution. We also expect that the future ICTES conference will be as successful and stimulating as indicated by the contributions presented in this volume.

Understanding Global Politics Dr Chanchal Kumar, Prof Lungthuiyang Riamei, Dr Sanju Gupta, 2017-02-15 Understanding Global Politics is a pioneering work which analyses contemporary issues such as climate change, migration, nuclear proliferation, terrorism as well as feminist perspective on International Relations. It covers the various dimensions of globalisation which affects on the accelerating world. The intergovernmental agencies such as International Atomic Energy Agency (IAEA), International Court of Justice as well as the United Nations are instrumental in directing the energies towards the control of proliferation of nuclear weapons. The last section of the book deliberates on the global shifts, power and governance in a fast changing world order. The salience of global, regional and economic groupings like WTO, IMF, World Bank, BRICS, EU etc are covered in great detail. The book presents an opportunity to engage in Applied Global Politics and explore the core concept by students of Political Science, International Relations as well as refresher for scholars of defence and security studies.

Comprehensive Systems Biomedicine Pietro Lio,Enrico Capobianco,2014-12-03

Systems Biomedicine is a field in perpetual development. By definition a translational discipline it emphasizes the role of quantitative systems approaches in biomedicine and aims to offer solutions to many emerging problems characterized by levels and types of complexity and uncertainty unmet before. Many factors including technological and societal ones need to be considered. In particular new technologies are providing researchers with the data deluge whose management and exploitation requires a reinvention of cross disciplinary team efforts. The advent of omics and high content imaging are examples of advances de facto establishing the necessity of systems approaches. Hypothesis driven models and in silico validation tools in support to all the varieties of experimental applications call for a profound revision. The focus on phases like mining and assimilating the data has substantially increased so to allow for interpretable knowledge to be inferred. Notably to be able to tackle the newly generated data dimensionality heterogeneity and complexity model free and data driven intensive applications are increasingly shaping the computational pipelines and architectures that quant specialists set aside of the high throughput genomics transcriptomics proteomics platforms. As for the societal aspects in many advanced societies health care needs now more than in the past to address the problem of managing ageing populations and their complex morbidity patterns. In parallel there is a growing research interest on the impact that cross disciplinary clinical epidemiological and quantitative modelling studies can have in relation to outcomes potentially affecting the quality of life of many people. Complex systems including those characterizing biomedicine are assessed in both their functionality and stability and also relatively to the capacity of generating information from diversity variation and complexity. Due to the combined interactions and effects such systems embed prediction power available for instance in both target identification or marker discovery or more generally for conducting inference about patients pathological states i.e. normal versus disease diagnostic or prognostic analysis and preventive assessment e.g. risk evaluation. The ultimate goal personalized medicine will be achieved based on the confluence of the system's predictive power to patient specific profiling.

Covid-19 and the Global Political Economy Tim Di Muzio, Matt Dow, 2022-09-26. Covid 19 and the Global Political Economy investigates and explores how far and in what ways the Covid 19 pandemic is challenging restructuring and perhaps remaking aspects of the global political economy. Since the 1970s neoliberal capitalism has been the guiding principle of global development: fiscal discipline, privatisations, deregulation, the liberalisation of trade and investment regimes and lower corporate and wealth taxation. But after Covid 19 will these trends continue particularly when states are continuing to struggle with overcoming the pandemic and violating one of neoliberalism's key

principles balanced budgets The pandemic has exposed the fragility of the global political economy and it can be argued that the intensification of global trade tourism and finance over the past 30 years has facilitated the spread of infectious diseases such as Covid 19 Therefore economies in lockdown jittery markets and massive government spending have sparked interest in potentially re evaluating certain features of the global political economy This volume brings together leading and upcoming critical scholars in international relations and international political economy to provide novel timely and innovative research on how the Covid 19 pandemic is impacting and will continue to impact the global economy in important dimensions including state fiscal policy monetary policy the accumulation of debt health and social reproduction and the future of austerity and the fate of neoliberalism This book will be of great interest to students scholars and experts in international relations and international political economy as well as history anthropology political science sociology cultural studies economics development studies and human geography Chapter 8 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
