Ethics in the University James G. Carbon Governance, Climate Change

and Business Transformation Adam Bumpus, James Tansey, Blas Luis Pérez Henríquez, Chukwumerije Okereke, 2014-07-17 Transformation to a low carbon economy is a central tenet to any discussion on the solutions to the complex challenges of climate change and energy security. Despite advances in policy, carbon management and continuing development of clean technology, fundamental business transformation has not occurred because of multiple political, economic, social and organisational issues. Carbon Governance: Climate Change and Business Transformation is based on leading academic and industry input and three international workshops focused on low carbon transformation in leading climate policy jurisdictions: Canada, USA and the UK under the international Carbon Governance Project (CGP) banner. The book pulls insights from this innovative collaborative network to identify the policy combinations needed to create transformative change. It explores fundamental questions about how governments and the private sector conceptualize the problem of climate change, the conditions under which business transformation can genuinely take place and key policy and business innovations needed. Broadly, the book is based on emerging theories of multi-levelled, multi-actor carbon governance and applies these ideas to the real world implications for tackling climate change through business transformation. Conceptually and empirically, this book stimulates both academic discussion and practical business models for low carbon transformation. **Federal Register**, 2012-09

Environmentalism in the United States Elizabeth Bomberg, David Schlosberg, 2013-09-13 Environmentalism defined here as activism aimed at protecting the environment or improving its condition is undergoing significant change in the United States. Under attack from the current administration and direct questioning from its own ranks, environmentalism in the US is at a crossroads. This special issue will explore the changing patterns of and challenges to environmentalism in the contemporary US. More specifically, it will examine the following dynamics: the re-conceptualisation of core ideas and strategies defining US environmentalism; questions of identity and relations with other advocacy groups including labour, global justice and women's groups; institutional change, especially the shift away from regulatory policies and approaches; the expanding arenas of activism to both above and below the state; environmentalists' response to Bush administration policies and priorities. This book was previously published as a special issue of *Environmental Politics*. *Climate Change: A Wicked Problem* Frank P. Incropera, 2016 A pragmatic, no-holds-barred assessment of climate change for anyone wishing to be fully informed on the topic.
