Diversity and Community in the

Academy Celia Wolf-Devine,2000-01-01 In the wake of court rulings that have forced university administrators to reevaluate affirmative action policies this balanced thoughtful book examines three typical defenses of those policies that affirmative action compensates for past discrimination that it provides role models and ensures diversity and that it corrects for systemic bias against women and racial minorities Wolf Devine finds that none of these arguments justifies adopting affirmative action across the board and she argues contrary to most opponents of the policy that some circumstances make affirmative action appropriate Analyzing the cultural economic and political contexts in which affirmative action has been debated she suggests ways to get around the current impasse over the issue without abandoning a commitment to social justice The depth and balance of the book are enhanced by an appendix containing articles by noted legal expert George Rutherglen distinguished philosopher James Rachels and independent scholar Richard Rodriguez *Ethics in Academia* Shyamal K. Majumdar,2000

Markie,2000-01-01 Professors administrators and trustees talk a lot about education but give little attention to teaching especially at major research universities In *A Professor's Duties* the distinguished philosopher Peter J Markie adds to the expanding discussion of the ethics of college teaching Part One concentrates on the obligations of individual professors primarily with regard to issues about what and how to teach Part Two expands Professor Markie's views by providing a selection of the most significant previously published writings on the ethics of college teaching

Higher Education in the United States James J. F. Forest,Kevin Kinser,2002-06-21 Surveys the changing landscape of American higher education from academic freedom to

virtual universities from campus crime to Pell Grants from the Student Privacy Act to student diversity In the years following World War II college and university enrollment doubled students revolted faculty unionized and community colleges evolved Tuition and technology soared as did the number of first generation minority and women students These changes radically transformed the American system of postsecondary education Today that system is in trouble Its aging professoriate prepares for retirement but low academic salaries can no longer attract the best minds to replace them A flood of corporate dollars funds commercial research but money for basic research the seedbed of American scientific preeminence has dried up Colleges and universities also face heated competition with for profit education providers for students faculty and external financial support along with the costs of providing remedial education to growing numbers of students who are unprepared for postsecondary education Higher Education in the United States provides a comprehensive analysis of these issues and others that scholars and practitioners of higher education study discuss and grapple with on a daily basis Thinking about Higher Education Paul Gibbs, Ronald Barnett, 2013-12-18 With higher education around the world in a period of extreme flux this volume explores its underlying philosophy a core element of the ongoing debate Offering a diverse range of perspectives from an international selection of renowned scholars of higher education the book is full of imaginative insights that add up to a substantive contribution to the discussion As universities attempt to adapt to a new environment characterized by stiff international competition networked remote learning burgeoning student numbers and comparative performance assessment how we conceptualize the purpose and ethos of our higher learning institutions is more important than ever This publication features a multitude of distinctive approaches that illuminate potential solutions to the complex issues universities must grapple with in these uncertain times Rather than espousing a singular philosophical approach the editors have assembled views from across the spectrum and from differing national contexts representing a multidisciplinary response to the situation This collection of papers aims thus to inspire fresh developments in the way we think about the complexities of and options available to higher education
