**Statistics of Income** ,1982      **The Data Model Resource Book, Volume 1** Len Silverston,2011-08-08 A quick and reliable way to build proven databases for core business functions Industry experts raved about The Data Model Resource Book when it was first published in March 1997 because it provided a simple cost effective way to design databases for core business functions Len Silverston has now revised and updated the hugely successful 1st Edition while adding a companion volume to take care of more specific requirements of different businesses This updated volume provides a common set of data models for specific core functions shared by most businesses like human resources management accounting and project management These models are standardized and are easily replicated by developers looking for ways to make corporate database development more efficient and cost effective This guide is the perfect complement to The Data Model Resource CD ROM which is sold separately and provides the powerful design templates discussed in the book in a ready to use electronic format A free demonstration CD ROM is available with each copy of the print book to allow you to try before you buy the full CD ROM      *Rural Livelihoods and Diversity in Developing Countries* Frank Ellis,2000-06-29 Rural families in developing countries make a living by engaging in diverse activities These range from farming to rural trade to migration to distant cities and even abroad This book explores the implications of rural livelihood diversity for key topics in development studies and for poverty reduction policies The livelihoods approach is gaining momentum and this is the first book to set it out in detail      **Trends in Public Sector Pay in OECD Countries 1995** OECD,1995-11-10 This report analyses recent trends in public sector pay in OECD countries It examines the links between public expenditure and public sector compensation costs and presents recent developments in pay determination systems in the public sector      *Whither Opportunity?* Greg J. Duncan,Richard J. Murnane,2011-09-01 As the incomes of affluent and poor families have diverged over the past three decades so too has the educational performance of their children But how exactly do the forces of rising inequality affect the educational attainment and life chances of low income children In *Whither Opportunity* a distinguished team of economists sociologists and experts in social and education policy examines the corrosive effects of unequal family resources disadvantaged neighborhoods insecure labor markets and worsening school conditions on K 12 education This groundbreaking book illuminates the ways rising inequality is undermining one of the most important goals of public education the ability of schools to provide children with an equal chance at academic and economic success The most

ambitious study of educational inequality to date *Whither Opportunity* analyzes how social and economic conditions surrounding schools affect school performance and children's educational achievement The book shows that from earliest childhood parental investments in children's learning affect reading math and other attainments later in life Contributor Meredith Phillip finds that between birth and age six wealthier children will have spent as many as 1 300 more hours than poor children on child enrichment activities such as music lessons travel and summer camp Greg Duncan George Farkas and Katherine Magnuson demonstrate that a child from a poor family is two to four times as likely as a child from an affluent family to have classmates with low skills and behavior problems attributes which have a negative effect on the learning of their fellow students As a result of such disparities contributor Sean Reardon finds that the gap between rich and poor children's math and reading achievement scores is now much larger than it was fifty years ago And such income based gaps persist across the school years as Martha Bailey and Sue Dynarski document in their chapter on the growing income based gap in college completion *Whither Opportunity* also reveals the profound impact of environmental factors on children's educational progress and schools functioning Elizabeth Ananat Anna Gassman Pines and Christina Gibson Davis show that local job losses such as those caused by plant closings can lower the test scores of students with low socioeconomic status even students whose parents have not lost their jobs They find that community wide stress is most likely the culprit Analyzing the math achievement of elementary school children Stephen Raudenbush Marshall Jean and Emily Art find that students learn less if they attend schools with high student turnover during the school year a common occurrence in poor schools And David Kirk and Robert Sampson show that teacher commitment parental involvement and student achievement in schools in high crime neighborhoods all tend to be low For generations of Americans public education provided the springboard to upward mobility This pioneering volume casts a stark light on the ways rising inequality may now be compromising schools functioning and with it the promise of equal opportunity in America
