1. Sample answers: Physical properties of a substance include color, shape, and density. Flammability is a chemical property of matter. Sugar dissolving in water is an example of a physical change. When a piece of iron metal rusts it is undergoing a chemical change.
2. Sample answer: Mass is the amount of matter in an object and is always constant. Weight is a measure of the gravitational force, and weight will change, depending on the object's distance from the Earth or other celestial bodies.
3. Sample answer: Mass is a measure of inertia. The more mass an object has, the more inertia it has.
4. Sample answer: Volume is the amount of space occupied by an object, and density is the amount of mass in a given volume.
