Nilson, 2023-07-03 In her latest book Linda Nilson puts forward an innovative but practical and tested approach to grading that can demonstrably raise academic standards motivate students tie their achievement of learning outcomes to their course grades save faculty time and stress and provide the reliable gauge of student learning that the public and employers are looking for She argues that the grading system most commonly in use now is unwieldy imprecise and unnecessarily complex involving too many rating levels for too many individual assignments and tests and based on a hairsplitting point structure that obscures the underlying criteria and encourages students to challenge their grades This new specifications grading paradigm restructures assessments to streamline the grading process and greatly reduce grading time empower students to choose the level of attainment they want to achieve reduce antagonism between the evaluator and the evaluated and increase student receptivity to meaningful feedback thus facilitating the learning process all while upholding rigor In addition specs grading increases students motivation to do well by making expectations clear lowering their stress and giving them agency in determining their course goals Among the unique characteristics of the schema all of which simplify faculty decision making are the elimination of partial credit the reliance on a one level grading rubric and the bundling of assignments and tests around learning outcomes Successfully completing more challenging bundles or modules earns a student a higher course grade Specs grading works equally well in small and large class settings and encourages

authentic assessment Used consistently over time it can restore credibility to grades by demonstrating and making transparent to all stakeholders the learning outcomes that students achieve This book features many examples of courses that faculty have adapted to spec grading and lays out the surprisingly simple transition process It is intended for all members of higher education who teach whatever the discipline and regardless of rank as well as those who oversee train and advise those who teach Specification grading promotes the following values and outcomes It 1 Upholds High Academic Standards2 Reflects Student Attainment of Skills and Knowledge 3 Motivates Students to Learn and to Excel4 Fosters Higher Order Cognitive Development and Creativity Discourages Cheating Reduces Student Stress Makes Students Feel Responsible for Their Grades8 Minimizes Conflict Between Faculty and Students9 Saves Faculty Time and Is Simple to Administer 10 Makes Expectations Clear and Simplifies Feedback for Improvement 11 Assesses Authentically 12 Achieves High Inter Rater Agreement Monthly Catalog of United States Government Publications United States. Australian Education Index ,1980 Integrating Human Factors Methods and Systems Thinking for Transport Analysis and Design Gemma J. M. Read,Vanessa Beanland,Michael G. Lenné,Neville A. Stanton,Paul M. Salmon,2017-07-26 Governments and road safety agencies around the world have either introduced or are considering safe system strategies a long overdue acknowledgement that different elements of the road system contribute to road safety outcomes Human factors approaches have a leading role here in both conceptualising the road system as a complex sociotechnical system and in providing practical approaches to support true systems based countermeasures This book illustrates the potential for integrating contemporary systems based human factors methods with modern day driving assessment methods such as vehicle instrumentation and driving simulation to understand and enhance performance in modern day road transport systems The book outlines why a fundamental paradigm shift is needed in the way these systems are designed and operated and illustrates how a wide range of accepted human factors approaches can be applied successfully to road transport to revolutionise the countermeasure design process The practical illustrations of these human factors methods are applied to a long standing road and rail safety issue rail level crossings where the road and rail systems intersect The final chapter of the book highlights the utility of the human factors approach to reducing road trauma and discusses future applications of the

approach The Growing Gap in Life Expectancy by Income National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Board on Mathematical Sciences and Their Applications, Division of Behavioral and Social Sciences and Education, Committee on Population, Committee on the Long-Run Macroeconomic Effects of the Aging U.S. Population--Phase II,2015-09-17 The U S population is aging Social Security projections suggest that between 2013 and 2050 the population aged 65 and over will almost double from 45 million to 86 million One key driver of population aging is ongoing increases in life expectancy Average U S life expectancy was 67 years for males and 73 years for females five decades ago the averages are now 76 and 81 respectively It has long been the case that better educated higher income people enjoy longer life expectancies than less educated lower income people The causes include early life conditions behavioral factors such as nutrition exercise and smoking behaviors stress and access to health care services all of which can vary across education and income Our major entitlement programs Medicare Medicaid Social Security and Supplemental Security Income have come to deliver disproportionately larger lifetime benefits to higher income people because on average they are increasingly collecting those benefits over more years than others. This report studies the impact the growing gap in life expectancy has on the present value of lifetime benefits that people with higher or lower earnings will receive from major entitlement programs The analysis presented in The Growing Gap in Life Expectancy by Income goes beyond an examination of the existing literature by providing the first comprehensive estimates of how lifetime benefits are affected by the changing distribution of life expectancy The report also explores from a lifetime benefit perspective how the growing gap in longevity affects traditional policy analyses of reforms to the nation's leading entitlement programs. This in depth analysis of the economic impacts of the longevity gap will inform debate and assist decision makers economists and researchers

Supplemental Nutrition Assistance Program National Research Council, Institute of Medicine, Committee on National Statistics, Food and Nutrition Board, Committee on Examination of the Adequacy of Food Resources and SNAP Allotments, 2013-05-23 For many Americans who live at or below the poverty threshold access to healthy foods at a reasonable price is a challenge that often places a strain on already limited resources and may compel them to make food choices that are contrary to current nutritional guidance To help alleviate this problem the U S Department of Agriculture USDA administers a number of nutrition assistance programs designed to improve access to healthy foods for low income individuals and households The largest of these programs is the Supplemental Nutrition Assistance Program SNAP formerly called the Food Stamp Program which today serves more than 46 million Americans with a program cost in excess of 75 billion annually The goals of SNAP include raising the level of nutrition among low income households and maintaining adequate levels of nutrition by increasing the food purchasing power of low income families In response to questions about whether there are different ways to define the adequacy of SNAP allotments consistent with the program goals of improving food security and access to a healthy diet USDA s Food and Nutrition Service FNS asked the Institute of Medicine IOM to

conduct a study to examine the feasibility of defining the adequacy of SNAP allotments specifically the feasibility of establishing an objective evidence based science driven definition of the adequacy of SNAP allotments consistent with the program goals of improving food security and access to a healthy diet as well as other relevant dimensions of adequacy and data and analyses needed to support an evidence based assessment of the adequacy of SNAP allotments Supplemental Nutrition Assistance Program Examining the Evidence to Define Benefit Adequacy reviews the current evidence including the peer reviewed published literature and peer reviewed government reports Although not given equal weight with peer reviewed publications some non peer reviewed publications from nongovernmental organizations and stakeholder groups also were considered because they provided additional insight into the behavioral aspects of participation in nutrition assistance programs In addition to its evidence review the committee held a data gathering workshop that tapped a range of expertise relevant to its task Armed Conflict, Women and Climate Change Jody M. Prescott, 2018-11-21 The gender differentiated and more severe impacts of armed conflict upon women and girls are well recognised by the international community as demonstrated by UN Security Council Resolution UNSCR 1325 on Women Peace and Security and subsequent resolutions Similarly the development community has identified gender differentiated impacts upon women and girls as a result of the effects of climate change Current research and analysis has reached no consensus as to any causal relationship between climate change and armed conflict but certain studies suggest an indirect linkage between climate change effects such as food insecurity and armed conflict Little research has been conducted on the possible compounding effects that armed conflict and climate change might have on at risk population groups such as women and girls Armed Conflict Women and Climate Change explores the intersection of these three areas and allows the reader to better understand how military organisations across the world need to be sensitive to these relationships to be most effective in civilian centric operations in situations of humanitarian relief peacekeeping and even armed conflict This book examines strategy and military doctrine from NATO the UK US and Australia and explores key issues such as displacement food and energy insecurity and male out migration as well as current efforts to incorporate gender considerations in military activities and operations This innovative book will be of great interest to students and scholars of international relations international development international security sustainability gender studies and law
