English in Primary Education Summer, Theresa, Böttger, Heiner, 2023-03-27 This

volume focuses on the teaching of English as a foreign language to young learners at primary school. The volume features an introduction that covers essentials of teaching English to young learners from a theoretical, empirical, and neuroscientific perspective while also discussing the notion of a principled mindset, competence development, transcultural learning, the use of materials and literature, and lesson planning. The subsequent contributions cover reading and writing, bilingual programs, the transition from primary to secondary school, storybooks, the importance of self-selected fiction, anti-bias education, ways of encouraging young learners to speak, and professional advice for primary English language educators based on a qualitative analysis of interviews. Based on an international TEFL lecture series, researchers, teacher educators, and practising teachers from Germany, Switzerland, and the United States share their insights into these central issues and offer theoretical concepts for the professional development of pre-service primary school English teachers. Practical ideas and examples included in this volume aim to make theoretical constructs accessible and relatable for future teachers of English. The afterword features a look ahead by critically examining future challenges of primary school educators and highlighting 1. the great importance of an early start with English as a foreign language and 2. the need for developing national educational standards. This volume provides a research-based and practice-oriented foundation for pre-service English teachers wishing to expand their knowledge and gain an insight into recent developments in foreign language learning theories and concepts. Although mostly aimed at primary school educators, particularly the introductory chapter will be equally relevant for university students or teachers focusing on vocational and secondary school teaching so that they develop an understanding of specific features of primary English language education and as concerns secondary school teachers can contribute to a smooth transition in the fifth grade.

The Budget of the United States Government United States. Bureau of the Budget, 1940 **Electronic Engineering**, 1954 Transformation of Higher Education Institutions in Post-Apartheid South Africa Chaunda L. Scott, Eunice N. Ivala, 2019-02-21 This book outlines successful transformation strategies and efforts that have been developed to assist the South African higher education system in moving beyond its post-apartheid state of being. Through case studies authored by South African higher education scholars and scholars affiliated with South African institutions, this book aims to highlight the status of transformation in the South African higher education system, demonstrate the variety of transformation initiatives used in academic institutions across South Africa, and offer recommendations to further advance this transformation. Written for scholars and advanced students of higher education in international settings, this volume aims to support quality research that benefits the demographic composition of South African academics and students and offers lessons that can inform higher education transformation in similarly multicultural societies.
