Monthly Catalog, United States Public Documents United States. Superintendent of Documents, 1965 February issue includes Appendix entitled Directory of United States Government periodicals and subscription publications September issue includes List of depository libraries June and December issues include semiannual index Chemical News and Journal of The Chemical News and Journal of Physical Science, 1897 The Quantum Ten Sheilla Physical Science ,1881 Jones, 2014-03-31 Theoretical physics is in trouble At least that s the impression you d get from reading a spate of recent books on the continued failure to resolve the 80 year old problem of unifying the classical and quantum worlds The seeds of this problem were sewn eighty years ago when a dramatic revolution in physics reached a climax at the 1927 Solvay conference in Brussels It's the story of a rush to formalize quantum physics the work of just a handful of men fired by ambition philosophical conflicts and personal agendas Sheilla Jones paints an intimate portrait of the ten key figures who wrestled with the mysteries of the new science of the quantum along with a powerful supporting cast of famous and not so famous colleagues The Brussels conference was the first time so many of the quantum ten had been in the same place Albert Einstein the lone wolf Niels Bohr the obsessive but gentlemanly father figure Max Born the anxious hypochondriac Werner Heisenberg the intensely ambitious one Wolfgang Pauli the sharp tongued critic with a dark side Paul Dirac the silent Englishman Erwin Schr dinger the enthusiastic womanizer Prince Louis de Broglie the French aristocrat Pascual Jordan the ardent Aryan nationalist who was not invited and Paul Ehrenfest who was witness to it all This is the story of quantum physics that has never been told an equation free investigation into the turbulent development of the new science and its very fallible creators including little known details of the personal relationship between the deeply troubled Ehrenfest and his dear friend Albert Einstein Jones weaves together the personal and the scientific in a heartwarming and heartbreaking story of the men who struggled to create quantum physics a story of passion tragedy ambition and science Bailey's index to 'The Times'. Nancy Bailey, 1899 A History of Scientific Journals Aileen Fyfe, Noah Moxham, Julie McDougall-Waters, Camilla Mørk Røstvik, 2022-10-03 Modern scientific research has changed so much since Isaac Newton s day it is more professional collaborative and international with more complicated equipment and a more diverse community of researchers Yet the use of scientific journals to report share and store results is a thread that runs through the history of science from Newton's day to ours Scientific journals are now central to academic research and careers Their editorial and peer review processes act as a check on new claims and findings and researchers build their careers on the list of journal articles they have published The journal that reported Newton's optical experiments still exists First published in 1665 and now fully digital the Philosophical Transactions has carried papers by Charles Darwin Dorothy Hodgkin and Stephen Hawking It is now one of eleven journals published by the Royal Society of London Unrivalled insights from the Royal Society s comprehensive archives have enabled the authors to investigate more than 350 years of scientific journal publishing The

editorial management business practices and financial difficulties of the Philosophical Transactions and its sibling Proceedings reveal the meaning and purpose of journals in a changing scientific community At a time when we are surrounded by calls to reform the academic publishing system it has never been more urgent that we understand its history Scientific, Technical and Health Personnel in the Federal Government National Science Foundation (U.S.),1959 Control of mercury emissions from coalfired electric utility boilers interim report including errata dated **32102** .
