Atoms bond together to achieve a more stable electronic configuration, typically by filling or emptying their valence electron shells to satisfy the octet rule.

2. What is bond length?
Bond length is the average distance between the nuclei of two bonded atoms in a molecule. It is determined by the balance of attractive and repulsive forces between the atoms.

3. What does bond length mean?
Bond length is the average distance between the nuclei of two bonded atoms in a molecule. It is determined by the balance of attractive and repulsive forces between the atoms.
