CHAPTER ONE LINEAR MOTION

Introduction

Study of motion is divided into two;

1. Kinematics
2. Dynamics

In kinematics forces causing motion are disregarded while dynamics deals with motion of objects and the forces causing them.

I. Displacement

Distance moved by a body in a specified direction is called displacement. It is denoted by letter 's' and has both magnitude and direction. Distance is the movement from one point to another. The SI unit for displacement is the metre (m).

II. Speed

This is the distance covered per unit time.

Speed = distance covered / time taken. Distance is a scalar quantity since it has magnitude only. The SI unit for speed is metres per second (m/s or ms⁻¹)

Average speed = total distance covered / total time taken

Other units for speed used are Km/h.

Examples

1. A body covers a distance of 10m in 4 seconds. It rests for 10 seconds and finally covers a distance of 50m in 60 seconds. Calculate the average speed.

Solution

Total distance covered = 10 + 50 = 100m

Total time taken = 4 + 10 + 6 = 20 seconds

Therefore average speed = 100 / 20 = 5m/s

2. Calculate the distance in metres covered by a body moving with a uniform speed of 180 km/h in 30 seconds.

Solution

Distance covered = speed * time

$$= 180 * 1000 / 60 * 60 = 50 \text{ m/s}$$

$$= 50 * 30$$

$$= 1,500 \text{ m}$$

3. Calculate the time in seconds taken a by body moving with a uniform speed of 360km/h to cover a distance of 3,000 km?

Solution

Speed: 360 km/h = 360 * 1000 / 60 * 60 = 100m/s

Time = distance / speed

$$3000 * 1000 / 100$$

$$= 30,000 \text{ seconds.}$$

III. Velocity

This is the change of displacement per unit time. It is a vector quantity.

Velocity = change in displacement / total time taken

The SI units for velocity are m/s

Schiffrin,2014-08-07 While the current conversation about work family balance and having it all tends to focus on women both men and women are harmed when conditions make it impossible to balance meaningful work with family life Yet both will benefit from re evaluating what it means to have it all and fighting for changes in their relationships and society to make greater equality possible Here Miriam Liss and Holly Hollomon Schiffrin discuss the ways in which we all define having it all and how we can obtain it for ourselves through a better evaluation of what we want from ourselves our families our jobs and each other Determining a 50 50 division of labor around the house may not be the thing that works for everyone Working from home or not at all may not be the thing to bring us satisfaction but learning what studies show and how to feel balanced and make those decisions to bring balance is crucial The authors argue that people can find balance in their roles by doing things in moderation Although being engaged in both parenting and work is good for well being people can avoid the pitfalls of over parenting and over working They show that balance can come from a meaningful consideration of what happiness and contentedness mean to us as individuals and how best to achieve our goals within the limitations of our current circumstances They illustrate that balance is not simply an individual problem Social issues such as the lack of parental leave flexible work schedules and affordable high quality child care make balance difficult With attention now on the issue they

argue that it s time men and women advocate for better services and better opportunities to achieve balance happiness and success in all their roles La science de l'enfant heureux Margot Sunderland,2017-08-25 Bonheur motions intelligence Ense basant sur les derni res d couvertes sur le cerveau et leur application l ducation cet ouvrage offre aux parents les cl s pour mieux comprendre leur enfant et lui donner toutes les chances de mener une vie panouie *Official Gazette* Philippines,2013 **Universal Access in Human-Computer Interaction: Universal Access to Information and Knowledge** Constantine Stephanidis,Margherita Antona,2014-05-15 The four volume set LNCS 8513 8516 constitutes the refereed proceedings of the 8th International Conference on Universal Access in Human Computer Interaction UAHCI 2014 held as part of the 16th International Conference on Human Computer Interaction HCII 2014 held in Heraklion Crete Greece in June 2014 jointly with 14 other thematically similar conferences The total of 1476 papers and 220 posters presented at the HCII 2014 conferences was carefully reviewed and selected from 4766 submissions These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems The papers thoroughly cover the entire field of human computer interaction addressing major advances in knowledge and effective use of computers in a variety of application areas The total of 251 contributions included in the UAHCI proceedings were carefully reviewed and selected for inclusion in this four volume set The 65 papers included in this volume are organized in the following topical sections access to mobile interaction access to text documents and media access to education and learning access to games and ludic engagement and access to culture
