Box, Gail P. Box, 2015-10-14 Our current climate is strongly influenced by atmospheric composition and changes in this composition are leading to climate change Physics of Radiation and Climate takes a look at how the outward flow of longwave or terrestrial radiation is affected by the complexities of the atmosphere's molecular spectroscopy This book examines the planet in     **Chronon Field Theory** Eytan H. Suchard, 2025-08-30 The Chronon Field Theory is revolutionary in many ways It was first conceived by Sam Vaknin in his doctoral dissertation 1982 4 But the current more geometric incarnation is largely the work of Eytan H Suchard who is a Machine Learning algorithms developer and a former student at the Technion in Haifa Israel In 1991 Suchard was a student of Professor Nathan Rosen Albert Einstein's collaborator Nathan Rosen's approach to physics was mainly geometrical unlike today's trend to try to obtain spacetime as emergent out of endless matrices and or a discrete theory which is based on particles In 2003 while working on models of signature recognition based on minimum action diffeomorphisms Eytan encountered the idea that the square acceleration of unit vectors can describe the electromagnetic phenomena Moreover the unit vector was derived from the gradient of a Morse function that can be interpreted as time just as in Geroch's Splitting Theorem The association with Professor Nathan Rosen's dissatisfaction with the Einstein-Grossmann action since the energy-momentum tensor is not described directly as part of spacetime geometry was an incentive to develop a new theory of time and matter In 2006 circa 2009 the author became familiar with the idea of a chronon field and of realization events via the work of Dr Sam Vaknin who has been offering new mathematical bibliography since then which proved to be vital to the development of the theory The familiarization with the new ideas thanks to Dr Sam Vaknin of realization events and a chronon field led to the work on fields of time and space to derive a new formalism of the Einstein-Grossmann equation for force fields in general Most of the work was done from 2017 up to 2025 although in 2012 the author became familiar with the uniform acceleration formalism of Tzvi Scarr and Yaakov Friedman and in 2013 2014 2015 and in 2017 rudimentary papers have been published In 2016 the main idea was presented by the author in the physics conference of International Association of Relativistic Dynamics IARD in Ljubljana in Slovenia In 2025 insights from Dr Sam Vaknin led the author to the idea that time asymmetry is a result of conservation of field orientations This conservation is vital for the acceleration fields to be non-vanishing along world lines Moreover dimension 4 itself is the minimal for such orientation to lead to the asymmetry of time This insight is contrary to the initial approach of the author in 2003 which was based on ideas from thermodynamics The technological outcome of the theory has yet to be

corroborated however signs for its validity may already exist in the experiments of Professor Timir Datta in the experiments of Dr Takaaki Musha and in the experiment Mark Sokol from Falcon Space with a high voltage DC baseline plus a high voltage AC wave Other experiments which may be related are experiments by Dr Charles Raymond Buhler The latter is less understood directly from the theory The author was in contact with Mark Sokol and his colleague Jerimiah Popp which further inspired work on technological ideas in 2024 2025

**Sea Level Variability and Change** Ivan D. Haigh, Marta Marcos, Sönke Dangendorf, Francisco Calafat, 2017-04-27 In June 2015 we held a workshop on the beautiful island of Mallorca Spain with a focus on sea level variability and change Over 120 sea level experts from around the world attended this workshop from a range of different disciplines The main aims of the workshop were to 1 Evaluate the current state of knowledge of sea level science 2 Identify gaps and unresolved questions in any aspect of sea level science and 3 Design future research to address these issues All aspects of sea level changes were covered from global to regional observations and modelling processes driving mean sea level changes and extremes from the geological scale to the instrumental era and future projections and including impacts on the coastal zones This E Book presents papers that came out of that workshop Overall these papers illustrate the multi disciplinary nature of sea level research cross cutting many fields of research including oceanography meteorology geology coastal morphodynamics engineering and the social economic aspects Collectively these articles represent an interesting range of perspectives and original studies that contribute to understanding the dynamic nature of sea level and its impacts across a wide range of time and space scales Enjoy reading them

**Forensic Gait Analysis** Ivan Birch, Michael Nirenberg, Wesley Vernon, Maria Birch, 2020-07-07 Gait analysis is the systematic study of human walking using the eye and brain of experienced observers augmented by instrumentation for measuring body movements body mechanics and the activity of the muscles Since Aristotle's work on gait analysis more than 2000 years ago it has become an established clinical science used extensively in the healthcare and rehabilitation fields for diagnosis and treatment Forensic Gait Analysis details the more recent and rapidly developing use of gait analysis in the forensic sciences The book considers the use of observational gait analysis based on video recordings to assist in the process of identification or exclusion With the increase in use of CCTV and surveillance systems over the last 20 to 30 years there has been a steady and rapid increase in the use of gait as evidence Currently gait analysis is widely used in the UK in criminal investigations with increasing awareness of its potential use in the US Europe and globally The book details the history of the science current practices and of the emergent application to establish best practice standards that conform to those of other forensic science disciplines Engagement with the Forensic Science Regulator and the Chartered Society of Forensic Sciences in the UK and the International Association for Identification has helped to ensure and enhance the quality assurance of forensic gait analysis However there remains a fundamental lack of standardized training and methodology for use in evidentiary and investigative casework This book fills that void serving as one of the first to describe the current state of

practice capabilities and limitations and to outline methods standards of practice and expectations of the gait analyst as a forensic practitioner Forensic Gait Analysis reflects current research and forensic practice and will serve as a state of the art guide to the use of gait analysis in the forensic context for both education and training purposes It will be a welcome addition to the libraries of professionals in the areas of podiatry gait analysis forensic video analysis law enforcement and legal practice

**The Growing Gap in Life Expectancy by Income** National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Board on Mathematical Sciences and Their Applications, Division of Behavioral and Social Sciences and Education, Committee on Population, Committee on the Long-Run Macroeconomic Effects of the Aging U.S. Population--Phase II, 2015-09-17 The U S population is aging Social Security projections suggest that between 2013 and 2050 the population aged 65 and over will almost double from 45 million to 86 million One key driver of population aging is ongoing increases in life expectancy Average U S life expectancy was 67 years for males and 73 years for females five decades ago the averages are now 76 and 81 respectively It has long been the case that better educated higher income people enjoy longer life expectancies than less educated lower income people The causes include early life conditions behavioral factors such as nutrition exercise and smoking behaviors stress and access to health care services all of which can vary across education and income Our major entitlement programs Medicare Medicaid Social Security and Supplemental Security Income have come to deliver disproportionately larger lifetime benefits to higher income people because on average they are increasingly collecting those benefits over more years than others This report studies the impact the growing gap in life expectancy has on the present value of lifetime benefits that people with higher or lower earnings will receive from major entitlement programs The analysis presented in The Growing Gap in Life Expectancy by Income goes beyond an examination of the existing literature by providing the first comprehensive estimates of how lifetime benefits are affected by the changing distribution of life expectancy The report also explores from a lifetime benefit perspective how the growing gap in longevity affects traditional policy analyses of reforms to the nation's leading entitlement programs This in depth analysis of the economic impacts of the longevity gap will inform debate and assist decision makers economists and researchers **16th**
