This book by the Asia Competitiveness Institute ACI presents the inaugural regional competitiveness analysis for the five regions of India as a basis for the Master Plan on Strategic Regional Economic Development using regional classifications as defined by the Confederation of Indian Industry Potential strategic clusters are identified for intra regional collaboration given each region s unique strengths and resource endowments to facilitate accelerated economic growth and development which is balanced fair and sustainable The book also presents an update of ACI s annual competitiveness analysis of India s 35 states and federal territories States and federal territories are ranked by ACI s comprehensive methodology by employing 75 indicators across four environments Going beyond the rankings the what if policy simulations offer states and federal territories relevant policy prescriptions based on their respective strengths and weaknesses A subset of the competitiveness indicators are then utilised for Geweke Causality Analysis to highlight the impact of strong leadership on economic development in the states of Bihar and Tamil Nadu

Teaching Science Karl Maton,J. R. Martin,Y. J. Doran,2021-04-25 Science has never been more important yet science education faces serious challenges At present science education research only sees half the picture focusing on how students learn and their changing conceptions Both teaching practice and what is taught science knowledge itself are missing This book offers new interdisciplinary ways of thinking about science teaching that foreground the forms taken by science knowledge and the language imagery and gesture through which they are expressed This book brings together leading international scholars from Systemic Functional Linguistics a long established approach to language and Legitimation Code Theory a rapidly growing sociological approach to knowledge practices It explores how to bring knowledge language and pedagogy back into the picture of science education but also offers radical innovations that will shape future research Part I sets out new ways of understanding the role of knowledge in integrating mathematics into science teaching scientific explanations and using multimedia resources such as animations Part II provides new concepts for showing the role of language in complex scientific explanations in how scientific taxonomies are built and in combining with mathematics and images to create science knowledge Part III draws on the approaches to explore how more students can access scientific knowledge how to teach professional reasoning the role of body language in science teaching and making mathematics understandable to all learners Teaching Science offers major leaps forward in understanding knowledge language and pedagogy that will shape the research agenda far beyond science education

Systems Engineering for the Digital Age Dinesh Verma, 2023-09-26 Systems Engineering for the Digital Age: Comprehensive resource presenting methods, processes, and tools relating to the digital and model-based transformation from both technical and management views. Systems Engineering for the Digital Age: Practitioner Perspectives covers methods and tools that are made possible by the latest developments in computational modeling, descriptive modeling, languages, semantic web technologies, and describes how they can be integrated into existing systems engineering practice, how best to manage their use, and how to help train and educate systems engineers of today and the future. This book explains how digital models can be leveraged for enhancing engineering trades, systems risk, and maturity, and the design of safe, secure, and resilient systems, providing an update on the methods, processes, and tools to synthesize, analyze, and make decisions in management, mission engineering, and system of systems. Composed of nine chapters, the book covers digital and model-based methods, digital engineering, agile systems engineering, improving system risk, and more, representing the latest insights from research in topics related to systems engineering for complicated and complex systems and system of systems. Based on validated research conducted via the Systems Engineering Research Center (SERC), this book provides the reader a set of pragmatic concepts, methods, models, methodologies, and tools to aid the development of digital engineering capability within their organization. Systems Engineering for the Digital Age: Practitioner Perspectives includes information on Fundamentals of digital engineering, graphical concept of operations, and mission and systems engineering methods, Transforming systems engineering through integrating M/S and digital thread, and interactive model-centric systems engineering, The OODA loop of value creation, digital engineering measures and model and data verification and validation, Digital engineering testbed transformation and implications on decision-making processes, and architecting tradespace analysis in a digital engineering environment, Expedited systems engineering for rapid capability and learning, and agile systems engineering framework. Based on results and insights from a research center and providing highly comprehensive coverage of the subject, Systems Engineering for the Digital Age: Practitioner Perspectives is written specifically for practicing engineers, program managers, and enterprise leadership, along with graduate students in related programs of study.
