Prothero,2015-08-25 Every fossil tells a story Best selling paleontology author Donald R Prothero describes twenty five famous beautifully preserved fossils in a gripping scientific history of life on Earth Recounting the adventures behind the discovery of these objects and fully interpreting their significance within the larger fossil record Prothero creates a riveting history of life on our planet The twenty five fossils portrayed in this book catch animals in their evolutionary splendor as they transition from one kind of organism to another We witness extinct plants and animals of microscopic and immense size and thrilling diversity We learn about fantastic land and sea creatures that have no match in nature today Along the way we encounter such fascinating fossils as the earliest trilobite Olenellus the giant shark Carcharocles the fishibian Tiktaalik the Frogamander and the Turtle on the Half Shell enormous marine reptiles and the biggest dinosaurs known the first bird Archaeopteryx the walking whale Ambulocetus the gigantic hornless rhinoceros Paraceratherium the largest land mammal that ever lived and the Australopithecus nicknamed Lucy the oldest human skeleton We meet the scientists and adventurers who pioneered paleontology and learn about the larger intellectual and social contexts in which their discoveries were made Finally we find out where to see these splendid fossils in the world s great museums Ideal for all who love prehistoric landscapes and delight in the history of science this book makes a treasured addition to any bookshelf stoking curiosity in the evolution of life on Earth **For Want of Wings** Jill Hunting,2022-02-24 In 1872 a young graduate of Yale University named Thomas Russell unearthed the bones of an 83 000 000 year old dinosaur in western Kansas The rare fossil an avian dinosaur with teeth and flightless wings proved that birds evolved from reptiles More than a century later Russell s great granddaughter set out to retrace her ancestor s forgotten expedition Part detective history part memoir For Want of Wings is Jill Hunting s captivating account of her journey into prehistory national history and family history In her quest to piece together fragments of her family s past Hunting ends up crisscrossing the United States from California to Connecticut On her first trip across the Colorado Rockies to the fossil bed site near Russell Springs Kansas Hunting brings along her then twenty six year old daughter When the book opens mother and daughter are both at crossroads each seeking to understand the impact of personal decisions on the landscape of her life As Hunting ventures forward she encounters unexpected resources such as

ten year old triplets who converse with her about dinosaurs and a Connecticut museum where portraits of her ancestors hang on the walls Through lively descriptions of these visits Hunting advances a view of history as nonlinear and full of unlikely coincidences For Want of Wings is also the carefully researched story of the least known of Yale s four expeditions into the American West led by eminent paleontologist O C Marsh the friendship between Russell s father and abolitionist John Brown a portrait of a mother and daughter evolving in self understanding and an inquiry into matters of race in American history and the author s own family In the end all these pieces converge like fragments of a fossil to form an exquisitely patterned work of historical exploration

**Cephalopods Present and Past: New Insights and Fresh Perspectives** Neil H.

Landman,Richard Arnold Davis,Royal H. Mapes,2007-09-09 Cephalopods are diverse highly developed molluscs capable of swimming and jet propulsion These animals are an important component of present day marine ecos tems throughout the world and comprise approximately 900 species They also have an extraordinary fossil record extending back to the Cambrian Period with as many as 10 000 extinct species Throughout their long history they have experienced sp tacular radiations and near total extinctions Because of their superb fossil record they also serve as ideal index fossils to subdivide geologic time This book touches on many of these themes and it treats both fossil and present day cephalopods The chapters are outgrowths of presentations at the Sixth International Symposium Cephalopods Present and Past at the University of Arkansas in Fayetteville September 16 19 2004 The Symposium was organized principally by Walter L Manger of the Department of Geology University of Arkansas The editors gratefully acknowledge Walter for his terrific job in putting together this symposium and for making it such an intellectual and social success Other publications related to this Symposium include the abstract volume assembled by W L Manger and two fie trip guidebooks one written by W L Manger and the other by R H Mapes Because this symposium was held in North America it honored four cephalopod workers from this continent William A Cobban US Geological Survey Denver Colorado Brian F Glenister University of Iowa Iowa City Iowa William M Furnish University of Iowa Iowa City Iowa and Gerd E G

Sea Monsters Michael J. Everhart,2007 A companion volume to the 3 D Sea Monsters film reveals the terrifying predators that lurked in the underwater Cretaceous world in a volume that also profiles the scientists who study these ancient monsters and the technology that made the film possible

Cretaceous Project 200, Volume 1: The Cretaceous World M.B. Hart,S.J. Batenburg,B.T. Huber,G.D. Price,N. Thibault,M. Wagreich,I. Walaszczyk,2025-04-02 The Cretaceous was first mentioned in the legend of a geological map largely centred on France published in 1822 by Jean Baptiste Julien d Omalius d Halloy Two hundred years of research have demonstrated that the Cretaceous records some of the highest sea levels atmospheric temperatures and extreme events in Earth history It was also a time of significant palaeogeographical changes and continental fragmentation This volume draws together a collection of papers that demonstrate these particularly Cretaceous events of warm climates sea level change and the impact of major volcanic events on the fauna and flora of the time Geochemical and stable isotope data are used to interpret these changing

environments and their impact on the Cretaceous ecosystem The volume closes with a description of the recent drilling of the Chicxulub bolide impact site

**Paleoecology** David J. Bottjer, 2016-04-18 PALEOECOLOGY PALEOECOLOGY Past Present and Future Paleoecology is a discipline that uses evidence from fossils to provide an understanding of ancient environments and the ecological history of life through geological time This text covers the fundamental approaches that have provided the foundation for present paleoecological understanding and outlines new research areas in paleoecology for managing future environmental and ecological change Topics include the use of actualism in paleoecology development of paleoecological models for paleoenvironmental reconstruction taphonomy and exceptional fossil preservation evolutionary paleoecology and ecological change through time and conservation paleoecology Data from studies of invertebrates vertebrates plants and microfossils with added emphasis on bioturbation and microbial sedimentary structures are discussed Examples from marine and terrestrial environments are covered with a particular focus on periods of great ecological change such as the Precambrian Cambrian transition and intervals of mass extinction Readership This book is designed for advanced undergraduates and beginning graduate students in the earth and biological sciences as well as researchers and applied scientists in a range of related disciplines

**The Late Triassic World** Lawrence H. Tanner, 2017-11-16 This volume presents the latest science on all significant geological and paleontological aspects of the Earth during the Late Triassic Period Rather than presenting a collection of narrowly focused research papers the volume consists of a series of peer reviewed chapters on specific aspects of the Late Triassic world e g tectonics magmatism paleobotany climate etc all authored by experts in the subject of their respective chapters Each chapter reviews and summarizes the latest findings in these fields and also includes a review of the pertinent literature The author list is very broadly international and forms a veritable who's who of expertise in these fields The book is loosely organized to present the physical aspects of Earth during the Late Triassic at the outset followed by the paleontological aspects The latter section is further organized to present the record of the marine environment first before moving onto land with fauna followed by flora The volume closes with a review of the end Triassic extinctions
