Innovations in Educational Change David Hung,Shu-Shing Lee,Yancy Toh,Azilawati Jamaludin,Longkai Wu,2019-08-07 This book offers an ecological perspective to understand the opportunities and complexities of spreading and sustaining educational innovations It explores the imperatives underpinning educational reforms and identifies the role of schools in developing disseminating and sustaining changes in Singapore s educational context It also includes international case studies that examine the dialectical relationships between structure people and culture and demonstrate that cultivating ecologies involves leveraging affordances and resources across the education system to create new contexts synergies and capacities Further it argues that educational innovations and reforms also need to consider tacit knowledge and conditions of transfer which may be ambiguous and challenging Few books address the nuances and interactions of innovation and change across levels of the education ecology from the micro classroom meso organisation school exo partners macro policy and chrono time scales levels The ecological perspective adopted in this book

explores the dynamic tensions in order to understand the interplays of policy and school level influences that contextualize school innovations By presenting multiple voices and views it allows impediments and affordances of innovation diffusion to be discussed holistically which is an integral caveat for nurturing a sustainable ecology that enables innovations Civic Education in the Elementary Grades Dana Mitra, Stephanie C. Serriere, 2015 As former elementary school teachers the authors focus on what is possible in schools rather than a romantic vision of what schools could be Based on a 5 year study of an elementary school this book shows how civic engagement can be purposive and critical a way to encourage young people to examine their environment to notice and question injustices and to take action to make a difference in their communities and school Focusing on the intersection of student voice and critical inquiry the book describes how to embed civic engagement into curriculum school decision making processes and whole school activities Chapters provide an overview of what research has demonstrated about civic engagement at the classroom school and community levels including detailed descriptions of activities and lessons for practice Classroom teachers school principals community members and teacher educators can use this resource to foster a deeper richer understanding of what is entailed in civic life Book Features A vivid portrait of a typical public school that wants to do more than teach to the test An examination of the conditions that enable young people to participate in democratic practices including identifying and questioning injustices Concrete examples of student voice and critical inquiry in classroom contexts Practices and activities that encourage children to get along with others exchange perspectives and work across differences Offers a suggestive range of evidence that high quality civic engagement initiatives can enhance students academic social and emotional engagement It reveals the nitty gritty of how experienced teachers can enable children who are immersed in meaningful civic work also to engage more deeply with mathematical problem solving peer collaboration literacy and social studies learning and development of empathy and mutual trust From the Foreword by Meira Levinson Mitra and Serriere show us not only that elementary aged children are capable of civic engagement but how such engagement can be nurtured in the classroom Children can be active civic participants this book demonstrates both the power of this idea and how we might accomplish this essential task Beth C Rubin Rutgers University
