Boswell,Cliff Brown,John Brueggemann,2006-03-09 It sometimes seems that racial conflict is an intractable impediment to class solidarity in the United States Yet in a time of economic depression and overt racism the unions of the CIO did on a number of occasions forge interracial solidarity among industrial workers of the 1930s and 1940s This book explores the role of racism and racial solidarity in union organizing efforts or strikes during the period between the Civil War and the Civil Rights Movement covering both those conditions and actions that enabled unions to realize interracial solidarity and those more common circumstances in which union organizing was defeated by racial competition The authors combine theories of racial competition specifically split labor market theory with game theory models of collective action to compare the patterns of race relations that accompanied nine American labor organizing drives and strikes They conclude that racial competition thwarted solidarity when minorities were recent immigrants or where employers used racist paternalism Where conditions were more favorable unions overcame racial divisions by institutionalizing their rhetoric about racial equality in the form of black organizers and black union officials in what came to be known as the miners formula This formula worked and the CIO unions today remain among the country s most integrated institutions and most powerful advocates of working class interests
