

The background of the cover is a detailed illustration of a molecular lattice, likely diamond or silicon, with grey spheres representing atoms and blue rods representing bonds. Scattered across this lattice are several translucent, glowing spheres. One large sphere is red with a pattern of white dots, and several smaller ones are yellow with a similar pattern. The overall lighting is dramatic, with highlights on the spheres and the lattice structure.

Physical Chemistry for the Biosciences Raymond Chang, 2005-02-11 This book is ideal for use in a one semester introductory course in physical chemistry for students of life sciences The author's aim is to emphasize the understanding of physical concepts rather than focus on precise mathematical development or on actual experimental details Subsequently only basic skills of differential and integral calculus are required for understanding the equations The end of chapter problems have both physiochemical and biological applications *Physical Chemistry for the Chemical and Biological Sciences* Raymond Chang, 2000-05-12 Hailed by advance reviewers as a kinder gentler P Chem text this book meets the needs of an introductory course on physical chemistry and is an ideal choice for courses geared toward pre medical and life sciences students Physical Chemistry for the Chemical and Biological Sciences offers a wealth of applications to biological problems numerous worked examples and around 1000 chapter end problems Problems and Solutions to Accompany Chang and Thoman's Physical Chemistry for Chemical Sciences Helen O. Leung, John D. Simon, William C. Trogler, 2014-06-15 Nothing can better help students understand difficult concepts than working through and solving problems By providing a strong pedagogical framework for self study this Solutions Manual will give students fresh insights into concepts and principles that may elude them in the lecture hall Nothing can better help students understand difficult concepts than working through and solving problems By providing a strong pedagogical framework for self study this Solutions Manual will give students fresh insights into concepts and principles that may elude them in the lecture hall It features detailed solutions to each of the even numbered problems from Raymond Chang and Jay Thoman's Physical Chemistry for the Chemical Sciences The authors approach each solution with the same conversational style that they use in their classrooms as they teach students problem solving techniques rather than simply handing out answers Illustrative figures and diagrams are used throughout **Physical Chemistry for the Chemical Sciences** Raymond Chang, 2014-06-15 Following in the wake of Chang's two other best selling physical chemistry textbooks Physical Chemistry for the Chemical and Biological Sciences and Physical Chemistry for the Biosciences this new title introduces laser spectroscopist Jay Thoman Williams College as co author Following in the wake of Chang's two other best selling physical chemistry textbooks Physical Chemistry for the Chemical and Biological Sciences and Physical Chemistry for the Biosciences this new title introduces laser spectroscopist Jay Thoman Williams College as co author This comprehensive new text has been extensively revised both in level and scope Targeted to a mainstream physical chemistry course this text features extensively revised chapters on quantum mechanics and spectroscopy many new chapter ending problems and updated references while biological topics have been largely relegated to the previous two textbooks Other topics added include the law of corresponding states the Joule Thomson effect the meaning of entropy multiple equilibria and coupled reactions and chemiluminescence and bioluminescence One way to gauge the level of this new text is that students who have used it will be well prepared for their GRE exams in the subject
