Village Phone Replication Manual David Keogh,Tim Wood,United Nations ICT Task Force,2005

Why is it such a challenge to provide telecommunications to rural areas High initial infrastructure investment relative low call volumes high maintenance costs due to harsh environments cash box collection needs cash security costs for coin operated phones card availability for prepaid airtime systems technical illiteracy remote locations and high transportation costs are just some of the impediments to providing rural telecommunications access This manual is based on the experiences of the Village Phone Programmes in Bangladesh and Uganda In rural villages where no telecommunications services have previously existed the programme provides cellular phones via a sustainable financing mechanism to poor entrepreneurs who use the phone to operate a business Such has been the success that over 2 000 village phone businesses are now operating in remote villages of Uganda This manual is a guideline for replicating the programme in a new country It establishes a template for creating sustainable initiatives that bring telecommunications to the poor create viable new businesses for micro entrepreneurs and expand the customer base for telecommunications companies

Disruptive Innovation in Chinese and Indian Businesses Peter Ping Li,2013-03-12 With the rapid development of China and India as new economic powers in global competition an obvious question is whether these emerging economies are great opportunities or threats Whilst answers are bound to differ depending on one s perspective it is increasingly clear that more local firms especially local entrepreneurs from these emerging economies will play a more critical role in global competition by becoming challengers to global incumbents Indeed the fact that the majority of their populations are at the bottom of the pyramid and thus cannot afford products designed for the developed markets has made these emerging economies fertile ground for developing and applying disruptive innovations A novel mix of key attributes distinctive from those of established technologies or business models disruptive innovations are typically inferior yet affordable and good enough products or services which originate in lower end market segments but later move up to compete with those provided by incumbent firms This book sheds new light on disruptive innovations both from and for the bottom of the pyramid in China and India from the point of view of local entrepreneurs and international firms seeking to operate their businesses there It covers both the theoretical and practical implications of disruptive innovation using conceptual frameworks alongside detailed case studies whilst also providing a comparison of conditions and strategic options in India and China Further unlike existing studies this book focuses on the neglected perspective of local challengers as the primary players and in doing so reveals the extent to which the future landscape of global competition may be shaped by disruptive innovation as well as its capacity to make the world flatter and more sustainable This unique book will be valuable to both scholars and practitioners interested in disruptive innovation and those working in the fields of Asian studies international business economics and globalization
