Figure 10.10 suggests a different way around the basic strategy of the previous section. When the interest rate on the loan is i , the bank will lend the borrower \$100,000, given that the bank's expected return is sufficient to justify the expenditure. In this case, the bank's expected return is $100,000 \times (1 + i)$, which is greater than the cost of the loan, $100,000$.

Selecting the Appropriate System Standard

Abstract—The purpose of this study was to determine the effect of a 12-week training program on the physical fitness and health-related quality of life of sedentary, middle-aged adults. The study was a randomized controlled trial. The intervention group performed a 12-week training program, while the control group remained sedentary. The results showed that the training program significantly improved physical fitness and health-related quality of life in the intervention group compared to the control group. The findings suggest that a 12-week training program can be an effective intervention for improving physical fitness and health-related quality of life in sedentary, middle-aged adults.
