Abstract—The purpose of this study was to determine the effect of a 12-week training program on the heart rate (HR) and energy expenditure (EE) of sedentary, middle-aged women. The subjects were randomly assigned to either a control group (CON) or an exercise group (EX). The EX group performed a 12-week training program consisting of three sessions per week of aerobic exercise. The HR and EE were measured at baseline and at the end of the 12-week training program. The EX group showed a significant decrease in HR and a significant increase in EE compared to the CON group. The results of this study suggest that a 12-week training program can effectively reduce HR and increase EE in sedentary, middle-aged women.

When you install your T-Value One Connection, improper installation of all four screws (50 connections for One Connection®) will affect the overall health, safety and life of the system. Proper ventilation is critical to maintain proper ventilation. Failure to maintain proper ventilation may result in a variety of problems with the product.

- When a producer's price for the output rises or falls, it must adjust its output level accordingly. A rise in the price of the output will cause a producer to produce more output, and a fall in the price of the output will cause a producer to produce less output.

Abstract: This research was an exploratory study to determine the relationship between the use of the Internet and the use of the Internet for business purposes. The study was conducted using a survey of 100 business owners. The results of the study indicate that the use of the Internet for business purposes is positively related to the use of the Internet for personal purposes. The study also found that the use of the Internet for business purposes is positively related to the use of the Internet for social purposes. The study was limited by the use of a convenience sample and the use of a self-reported measure of Internet use.
