RJ Alexander

Rawlinsons Construction Handbook 23:

The Management of Construction: A Project Lifecycle Approach F. Lawrence Bennett, 2007-06-01 Management of Construction introduces all aspects of management practice to students and professionals based in the construction industry. It is also important for those involved in allied fields such as design project development and site monitoring and inspection. The book addresses each stage of the construction project from conception to completion giving a perspective on the whole life cycle often missing from textbooks. The author also balances engineering concerns with the human resource and personal aspects of construction management that are so important to the successful outcome of a project.

Australian Guidebook for Structural Engineers Lonnie Pack, Brian Kinnear, 2024-12-09 This guidebook is a practical and essential tool covering all the necessary steps for structural design engineers to create detailed and accurate calculations in accordance with Australian and international standards. General project requirements are explained in terms of project management and document control. Calculation methods and details are shown for actions wind seismic dead and live loads. Design details are then provided for steel concrete timber and geotechnical calculations footings piles retaining walls etc. Detailed worked example calculations are included throughout the text as well as typical CAD details for design drawings. Design items are explained for typical items of equipment found across various industries e.g. piping vessels lifting machine foundations access composite structures bunds and more. Design aids are provided including guides and examples for popular engineering programs Space Gass Strand7 and Rhinoceros 3D.
