

SAFETY PRECAUTIONS

SERVICE WARNING

Check grounded service connections when in contact with radio tubes and associated chassis components and leads before servicing parts.
Be sure power source is properly disconnected and locked out for an electric shock hazard before working on the radio receiver.
When working on receiver, use an isolation transformer between the line and all power sources.

SERVICING THE HIGH VOLTAGE AND CRT

The high voltage section must operate at high voltages during the servicing of the high voltage section of the radio receiver. Be sure you are qualified to do this work and that you have the appropriate safety equipment for this work. A complete safety program is recommended for CRT in service repair work of television.

X-RAY RADIATION AND HIGH VOLTAGE LIMITS

Be aware of the following safety precautions involving X-ray emission. X-ray emission is caused by the electron beam striking the phosphor screen of the tube. High voltage high voltage section is available in all tubes. Check your service manual for the following safety precautions. Check the high voltage is correct from the tube to the cathode. Check the high voltage is correct from the tube to the anode. Check the high voltage is correct from the tube to the screen. Check the high voltage is correct from the tube to the grid. Check the high voltage is correct from the tube to the focus. Check the high voltage is correct from the tube to the heater. Check the high voltage is correct from the tube to the base. Check the high voltage is correct from the tube to the top. Check the high voltage is correct from the tube to the bottom. Check the high voltage is correct from the tube to the side.
