produced a plethora of instruments and actors at various levels that present a challenge to more traditional forms of command and control regulation In this respect it is commonly maintained that new governance generally and political experimentation more broadly weakens the power of the courts producing a legitimacy problem for new forms of governance and perhaps more fundamentally for law itself Focusing on the European Union this book offers a new account of the role of the courts in new governance Connecting new governance with the conception of deliberative democracy this book demonstrates how the role of courts has been transformed by the legal and political experimentation currently taking place in the European Union Drawing on a series of case studies it is argued that although deliberations in governance frameworks provide little by way of hard binding law these collaborative frameworks nevertheless condition judicial decision making With far reaching implications for how we understand the justiciability of soft law participation rights the legitimacy of governance measures and the role of courts beyond the nation state this book argues that far from undermining the power of the courts governance regimes assist their functioning Its analysis will therefore be of considerable interest for lawyers political scientists and anyone interested in the transformation of the judiciary in the era of new governance
