The Complete Guide to Making Mead, Updated Edition Steve Piatz, 2025-06-03 Make delicious meads in many varieties and flavor profiles with this completely updated edition of the definitive companion book for home mead making. Some stories suggest that mead was originally discovered when one of our not yet upright forebears stuck their hand in a fermenting bee hive and came away with a honeycomb containing a little more than they bargained for. Whatever the truth, brewers have brought this beverage into the twenty-first century and you can rest assured that *The Complete Guide to Making Mead* is a thoroughly up-to-date, modern and authoritative guide to homemade mead. Best of all, it has something for everyone, from the stone-cold beginner to the seasoned veteran. Written by award-winning mead maker Steve Piatz, the book features a brief history of the fermented beverage and a rundown of the various types of mead. Dozens of recipes for basic meads: honey only, melomels (honey and fruit), metheglins (honey and spices), and braggots (honey and malt). A discussion of the many types of honey that are available, their characteristics, and where to source them. Information on yeast and special ingredients, as well as what equipment is necessary and recommended. An illustrated and detailed look at the basic process. Advanced techniques such as oaking, clarifying, aging, spicing, and blending. Guidance on developing recipes and troubleshooting problems with the brewing process. More than 100 color photos. The MassGeneral Hospital for Children Handbook of Pediatric Global Health Nupur Gupta, Brett D. Nelson, Jennifer Kasper, Patricia L. Hibberd, 2013-10-18 The MassGeneral Hospital for Children Handbook of Pediatric Global Health is a concise resource for the ever-increasing number of health professionals involved in global health, many of whom spend a few weeks to months or even years providing medical care in resource-poor countries. This Handbook provides practical, evidence-based, hands-on guidance for managing and preventing childhood illnesses when resources are limited in low and middle-income countries. It also offers a setting-specific understanding and management approaches to the major causes of childhood mortality, including pneumonia, diarrhea, birth asphyxia, complications of preterm birth, and neonatal sepsis. The Handbook provides an overview of childhood mortality, health systems, and the various stakeholders that play a role in the global health arena, and also contains chapters focusing on adolescents, who are increasingly recognized as a unique population in whom interventions can go a long way in both consolidating the gains made in childhood and preventing adult disease. Finally, key topics in non-communicable diseases are covered, including trauma and injuries, pediatric mental health, child and adolescent rights, and oral health. Not meant solely for pediatricians, the Handbook is designed for generalists, specialists, doctors, nurses, other health-care workers, and those in training. An indispensable reference for health professionals overseas, the Handbook will also be a useful addition and resource for academic centers and universities in industrialized nations that are creating courses for trainees who will do clinical electives abroad during their training.
