GETTING STARTED

Checking the package contents

Make sure your package includes the items shown here.

Modular jack

To properly connect your phone to your telephone lines, you will need an RJ11 type modular phone jack. If you do not have a modular jack, call your local phone company to find out how to get one installed.

Installation note: Avoid places near electrical equipment such as refrigerators, computers, TVs or fluorescent lamps. These may cause interference or reduce the operating range of the cordless telephone.

Digital Security System

Your cordless phone uses a digital security system to provide protection against false ringing, unauthorized access and changes to your phone lines.

When you place the handset in the base, the unit verifies its security code. After a power outage or battery replacement, place the handset in the base for about 20 seconds to reset the code.
