**Scientific Conceptualization and Ontological Difference** Dimitri Ginev, 2019-07-22 Ginev works out a conception of the constitution of scientific objects in terms of hermeneutic phenomenology Recently there has been a revival of interest in hermeneutic theories of scientific inquiry The present study is furthering this interest by shifting the focus from interpretive methods and procedures to the kinds of reflexivity operating in scientific conceptualization According to the book's central thesis a reflexive conceptualization enables one to take into consideration the role which the ontic ontological difference plays in the constitution of scientific objects The book argues for this thesis by analyzing the formation of objects of inquiry in a range of scientific domains stretching from highly formalized domains where the quest for objects identities is carried out in terms of objects emancipation from structures to linguistic and historiographic programs that avoid procedural objectification in their modes of conceptualization The book sets up a new strategy for the dialogue between the theories of scientific inquiry and hermeneutic phenomenology

**The Evolution of Human Wisdom** Celia

Deane-Drummond, Agustín Fuentes, 2017-10-18 This volume addresses key questions about the puzzle of human origins by focusing on a topic that is largely unexplored thus far namely the evolution of human wisdom How can we best understand the human capacity for wisdom where did it come from and how did it emerge It explores lines of convergence and divergence between Christian theology and evolutionary anthropology in its search to identify different aspects of wisdom Critical to this discussion are the philosophical difficulties that arise when two very different methodological approaches to the manner of humans becoming wise are brought together The relative importance and significance of human language is another area of intense debate in defining the meaning of wisdom and its expression How far and to what extent does a theologically informed wisdom discourse push evolutionary anthropology to formulate new questions and vice versa This volume shows that there is no simple consonance between evolutionary anthropology and theology Yet each discipline has much to learn from the other the authors are in agreement that even in the midst of an awareness of dissonance and some tension there can still be mutual respect The goal of this book is to begin to develop a trans disciplinary approach to the evolution of human wisdom where each discipline is challenged to ask questions in a new way This volume tackles the relationship between theology and science in a fresh way by focusing on a specific theme wisdom that is equally generative for both theology and evolutionary anthropology

Scott Spencer focuses on a neglected area in the study of Jesus and the Gospels: the emotional life of Jesus. This book offers a fresh reading of the Gospels through the lens of Jesus's emotions: anger, grief, disgust, surprise, compassion, and joy. These emotions motivate Jesus's mission and reveal to Gospel readers what matters most to him. Thinking Radical Democracy Martin Breugh, Christopher Holman, Rachel Magnusson, Paul Mazzocchi, Devin Penner, 2015-01-01 Thinking Radical Democracy is an introduction to nine key political thinkers who contributed to the emergence of radical democratic thought in post-war French political theory: Hannah Arendt, Maurice Merleau-Ponty, Pierre Clastres, Claude Lefort, Cornelius Castoriadis, Guy Debord, Jacques Rancière, Étienne Balibar, and Miguel Abensour. The essays in this collection connect these writers through their shared contribution to the idea that division and difference in politics can be perceived as productive, creative, and fundamentally democratic. The questions they raise regarding equality and emancipation in a democratic society will be of interest to those studying social and political thought or democratic activist movements like the Occupy movements and Idle No More.

**At the Center** Casey Nelson Blake, Daniel H. Borus, Howard Brick, 2019-12-03 At a time when American political and cultural leaders asserted that the nation stood at the center of world awareness, thinkers and artists sought to understand and secure principles that lay at the center of things. From the onset of the Cold War in 1948 through 1963, they asked: What defined the essential character of American culture? Could permanent moral standards guide human conduct amid the flux and horrors of history? In what ways did a stable self emerge through the life cycle? Could scientific method rescue truth from error, illusion, and myth? Are there key elements to democracy: to the integrity of a society, to order in the world? Answers to such questions promised intellectual and moral stability in an age haunted by the memory of world war and the possibility of future devastation on an even greater scale. Yet other key figures rejected the search for a center, asserting that freedom lay in the dispersion of cultural energies and the plurality of American experiences. In probing the centering impulse of the era, *At the Center* offers a unique perspective on the United States at the pinnacle of its power.

century The independent Bar has transformed in the last 30 years into a commercialised enterprising profession Based on  
interviews with and observation of barristers and chambers staff this book identifies key changes that have taken place at the  
Bar and how these are reshaping and reformulating barristers professionalism and working culture This is the first empirical  
overview of the depth scope and effects of multiple reforms that have been imposed on the profession It explores how this  
once unified profession has fragmented as the lived experiences of barristers in different practice areas have diverged Highly  
specialised sets of chambers now operate like businesses whilst others who are dependent on legal aid funding struggle to
