John K. Davis, 2024-03-19 An examination of the ethical issues raised by the possibility of human life extension including its desirability unequal access and the threat of overpopulation Life extension slowing or halting human aging is now being taken seriously by many scientists Although no techniques to slow human aging yet exist researchers have successfully slowed aging in yeast mice and fruit flies and have determined that humans share aging related genes with these species In New Methuselabs John Davis offers a philosophical discussion of the ethical issues raised by the possibility of human life extension Why consider these issues now before human life extension is a reality Davis points out that even today we are making policy and funding decisions about human life extension research that have ethical implications With New Methuselabs he provides a comprehensive guide to these issues offering policy recommendations and a qualified defense of life extension After an overview of the ethics and science of life extension Davis considers such issues as the desirability of extended life whether refusing extended life is a form of suicide the Malthusian threat of overpopulation equal access to life extension and life extension and the right against harm In the end Davis sides neither with those who argue that there are no moral objections to life enhancement nor with those who argue that the moral objections are so strong that we should never develop it Davis argues that life extension is on balance a good thing and that we should fund life extension research aggressively and he proposes a feasible and just policy for preventing an overpopulation crisis **The Health Detective's 456 Most Powerful Healing Secrets (Volume 1 of 3) (EasyRead Super Large 20pt Edition) ,** **Handbook of Anti-Aging Medicine** Prof Dr Mike KS Chan, Arseniy Trukhanov, Vittorio Calabrese, 2023-01-16 This handbook focuses on different aspects of anti aging and both preventive and regenerative medicine It includes analysis of the paradigm of ageing and concepts of anti aging medicine Standards and technologies are highlighted in over twenty chapters all authored by international experts in regenerative medicine Topics covered include Ageing aging and anti aging A Decalogue for anti aging medicine Lessons from Sicilian centenarians for anti aging medicine Molecular biomarkers and genetic aspects of aging Future of peptides in clinical practice Mitochondrial approaches in anti aging medicine and in SARS CoV2 infection Tissue specific autoantibodies in preventive medicine Chronic stress as a psycho neuro immunological dysfunction Gut associated immune system and its health implications Regenerative medicine with platelet rich plasma Alzheimer s disease Preventive and anti aging neurology Autistic spectrum disorder and mitochondrial medicine Integrative hormonal approach in anti aging medicine Preventive cardiology and phlebology Aesthetic and anti aging medicine Preventive ophthalmology Preventive oncology Nutrition in healthy aging Physical activity and fitness paradigms for anti aging and longevity Recommended reading for clinicians working in anti aging medicine as well as ageing people The authors hope it will set a

alternative health presents his program to control the symptoms of aging discussing the processes and factors that contribute to aging the hormonal keys to health and a diet and exercise regimen **Official Gazette of the United States Patent and Trademark Office** ,2004 *Weekly World News* ,1998-02-10 Rooted in the creative success of over 30 years of supermarket tabloid publishing the *Weekly World News* has been the world's only reliable news source since 1979 The online hub www.weeklyworldnews.com is a leading entertainment news site The Death Gene George J. Brewer,2002-04-29 As most everyone who reads the newspapers these days will be aware DNA technology and cloning genes isolating and obtaining the DNA for a specific gene is on the cutting edge of science Almost every week a new gene is cloned its DNA sequence determined and its function discovered Discoveries of genes that cause specific diseases even some cancers such as breast cancer are being made on a regular basis The gene that is discovered in the present story is at present fictional It is a gene that promotes the aging process and therefore it promotes death The flip side of the gene is that if its action is turned off by a new drug as it is in the story it stops aging and allows an unlimited life span Neither the discovery of such a gene or its manipulation by a drug are at all far fetched In fact it can be anticipated that such a gene probably will be discovered sooner or later This is a story about what happens when such a gene and a way to turn it off are discovered

Story Line It all started with something seemingly trivial the interruption of the usual behavior of the pet mice in Dr Al Grogans laboratory A world class physician scientist in his mid fifties Grogan has been spending long evenings in his lab and office trying to solve a riddle Why had one of his discoveries a promising new long acting contraceptive called DNA C129 quit working The unusual squeaks and sounds of protest from the mice interrupted Grogans concentration The reason the mice are disturbed is obvious Maria Grogans new lab assistant an attractive lady in her late thirties has disturbed the mice by peering closely at them Initially disgruntled at the interruption Grogan nevertheless demonstrates to Maria a trick he had taught the mice Maria asks about the age of the mice and Grogan says they're maybe four years old since they were part of the original DNA C129 experiments Maria who has had considerable experience studying mouse aging contradicts her boss saying that mice of this strain simply don't live that long In human terms they would be the equivalent of two hundred years old Grogan who now realizes he isn't very well informed about mouse life span tells Maria he was probably mistaken about the age of the mice But he knows they are really about four years old and his mind starts churning excitedly about some of the possible effects of DNA C129 and about the reason it may have stopped working With this new clue things begin to snap into place in Grogans mind DNA C129 had quit working when he had lost his junior partner a younger man named Bowdler who had been carrying out the actual experiments under Grogans general supervision Bowdler had been killed in an auto accident Grogan now realizes that DNA C129 has antiaging properties and probably owes its long lasting effects to Bowdler doing an outlaw experiment namely using an illegal vector the viral like particle that delivers the therapy DNA one that had not been authorized by Grogan The keys to DNA C129 effects including its antiaging effects no doubt lay not only in its own innate

properties but in the vector Bowdler had used With Bowdler's death and with Grogan now using the standard vector DNA C129 had lost its properties in Grogan's experiments During the next four months the Grogan lab becomes a beehive of activity as Grogan sets out to test these ideas As the work goes on a romance develops between Grogan and Maria However Grogan is very secretive about the purpose of the experiments even with Maria He works for a modest sized biotech company in Madison Wisconsin called DNA Unlimited and he doesn't trust management He codes all the results and mixes up the experiments in such a manner that no single technician has a complete picture of the studies and the results During this time Grogan places regular calls to a former student and current best friend Kirk Starge
