Superalloys 2012 Eric S. Huron, Roger C. Reed, Mark C. Hardy, Michael J. Mills, Rick E. Montero, Pedro Dolabella Portella, Jack Telesman, 2012-10-02 A superalloy or high performance alloy is an alloy that exhibits excellent mechanical strength at high temperatures Superalloy development has been driven primarily by the aerospace and power industries This compilation of papers from the Twelfth International Symposium on Superalloys held from September 9 13 2012 offers the most recent technical information on this class of materials

*Gas Turbine Powerhouse* Dietrich Eckardt, 2025-04-21 This book tells the story of the power generation gas turbine from the perspective of one of the leading companies in the field over a period of nearly 100 years written by an engineer Especially in times of imminent global economic crises it appears to be worthwhile to reflect on real economic values and technological leadership based on engineering ingenuity and enduring management Though the original edition of the book was primarily designed as a technical history of the BBC ABB Alstom power generation gas turbines its scope is sufficiently broad to cover general development trends including parallel competitor activities correspondingly the title of this reviewed 3rd edition was adapted in a more general sense A special benefit is the historical breakdown to the gas turbine component level so that the book actually outlines the development of axial compressors from early beginnings based on Prandtl's wing theory the progress in combustion technology towards extraordinary low emission values and that of axial turbines with special emphasis on early turbine cooling innovations already in the 1930s a stroke of genius of the BBC Baden engineering team The sheer length of certain engineering developments over several decades allows interesting historic observations and deductions on inherent business mechanisms the effects of technology preparations and organisational consequences A look into the mirror of the past provides revelations on the impact of far reaching business decisions In 2017 the book received the prestigious Engineer Historian Award of the ASME American Society of Mechanical Engineers

**Cellular Imaging** Eric Hanssen, 2017-12-30 This book highlights important techniques for cellular imaging and covers the basics and applications of electron tomography and related techniques In addition it considers practical aspects and broadens the technological focus by incorporating techniques that are only now becoming accessible e.g. block face imaging The first part of the book describes the electron microscopy 3D technique available to scientists around the world allowing them to characterize organelles cells and tissues The major emphasis is on new technologies like scanning transmission electron microscopy STEM tomography though the book also reviews some of the more proven technologies like electron tomography In turn the second part is dedicated to the reconstruction of data sets signal improvement and interpretation

**Gas Turbine Heat Transfer and Cooling Technology, Second Edition** Je-Chin Han, Sandip Dutta, Srinath Ekkad, 2012-11-27 A comprehensive reference for engineers and researchers Gas Turbine Heat Transfer and Cooling Technology Second Edition has been completely revised and updated to reflect advances in the

field made during the past ten years The second edition retains the format that made the first edition so popular and adds new information mainly based on selected published papers in the open literature See What's New in the Second Edition State of the art cooling technologies such as advanced turbine blade film cooling and internal cooling Modern experimental methods for gas turbine heat transfer and cooling research Advanced computational models for gas turbine heat transfer and cooling performance predictions Suggestions for future research in this critical technology The book discusses the need for turbine cooling gas turbine heat transfer problems and cooling methodology and covers turbine rotor and stator heat transfer issues including endwall and blade tip regions under engine conditions as well as under simulated engine conditions It then examines turbine rotor and stator blade film cooling and discusses the unsteady high free stream turbulence effect on simulated cascade airfoils From here the book explores impingement cooling rib turbulent cooling pin fin cooling and compound and new cooling techniques It also highlights the effect of rotation on rotor coolant passage heat transfer Coverage of experimental methods includes heat transfer and mass transfer techniques liquid crystal thermography optical techniques as well as flow and thermal measurement techniques The book concludes with discussions of governing equations and turbulence models and their applications for predicting turbine blade heat transfer and film cooling and turbine blade internal cooling

**Unsteady Aerodynamics and Aeroelasticity of Turbomachines** Torsten H. Fransson, 2012-12-06 Twenty one years have passed since the first symposium in this series was held in Paris 1976 Since then there have been meetings in Lausanne 1980 Cambridge 1984 Aachen 1987 Beijing 1989 Notre Dame 1991 and Fukuoka 1994 During this period a tremendous development in the field of unsteady aerodynamics and aeroelasticity in turbomachines has taken place As steady state flow conditions become better known and as blades in the turbomachine are constantly pushed towards lower weight and higher load and efficiency the importance of unsteady phenomena appear more clearly than The 8 Symposium was as the previous ones of high quality Furthermore it presented the audience with the latest developments in experimental numerical and theoretical research More papers than ever before were submitted to the conference As the organising committee wanted to preserve the uniqueness of the symposium by having single sessions and thus mingle speakers and audience with different backgrounds in this interdisciplinary field only a limited number of papers could be accepted 54 papers were accepted and presented at the meeting all of which are included in the present proceedings The Mining
