Indian Emission Norms and Practices Mr P. Vignesh,Dr. A.R. Pradeep Kumar,Dr. N. Shankar Ganesh, In India vehicle emission standards were implemented in 1991 for gasoline vehicles and in 1992 for diesel vehicles Since 2000 Euro standards have been followed in India under the name Bharat Stage Emission Standards for four wheeled vehicles Since October 2010 Bharat Stage III norms have been implemented throughout India Bharat Stage IV norms have been in effect in a few cities since April 2010 Bharat Stage IV is expected to be implemented throughout India by April 2017 It is already in use in 13 major cities Upgrading the emission standards necessitates the upgrading of manufacturing companies technology which raises the cost of the vehicle One of the main reasons for the slow upgrade of emission standards is cost However

there are some who argue that the cost increase is offset by cost savings in health care because the pollutants that cause disease are reduced as emission standards are raised Fuels are also important in meeting these emission standards Fuel specifications have also been aligned with the corresponding European production norms Air Pollution from Motor Vehicles Asif Faiz, Christopher S. Weaver, Michael P. Walsh, 1996-01-01 Contributions by Surhid Gautam and Lit Mian Chan This book presents a state of the art review of vehicle emission standards and regulations and provides a synthesis of worldwide experience with vehicle emission control technologies and their applications in both industrial and developing countries Topics covered include The two principal international systems of vehicle emission standards those of North America and Europe Test procedures used to verify compliance with emissions standards and to estimate actual emissions Engine and aftertreatment technologies that have been developed to enable new vehicles to comply with emission standards as well as the cost and other impacts of these technologies An evaluation of measures for controlling emissions from in use vehicles The role of fuels in reducing vehicle emissions the benefits that could be gained by reformulating conventional gasoline and diesel fuels the potential benefits of alternative cleaner fuels and the prospects for using hydrogen and electric power to run motor vehicles with ultra low or zero emissions This book is the first in a series of publications on vehicle related pollution and control measures prepared by the World Bank in collaboration with the United Nations Environment Programme to underpin the Bank's overall objective of promoting transport that is environmentally sustainable and least damaging to human health and welfare **Pontiac Onboard Diagnostics** Automotive Training Group, 2009
