The Verbum Substantivum from Synchronic, Diachronic and Typological Perspectives* Michail L. Kotin, Richard Whitt, 2015-10-13 The verbs of the to be group also called verba substantiva belong to the most enigmatic phenomena of the human language Combining a distinct suppletivity of their conjugational forms in most languages with a striking semantic and functional ambiguity as well as unique syntactic capabilities they form a very specific class of linguistic entities They can be referred to without exaggeration as one of the conceptually gravest and most symptomatic language formations Typologically the be verbs demonstrate on the one hand a set of similar features in almost every language which is excellent evidence of their universal validity On the other hand the differences between these verbs in various language groups and even in particular languages are remarkable proof of language relativism Historically the be verbs show a sequence of relevant stages in their formal semantic and syntactic developments which in many aspects coincide with their typological and individual idioethnic features and properties One can trace among other things paths and mechanisms of their development and salient changes of their functions in language systems of different types Especially important are also changes in the form and function of the be verbs arising from language contact for they indicate essential tendencies in the evolution of these entities accelerated by the influence of language interaction triggers The contribution of

to be verbs to the morphology semantics and syntax of the majority of the languages of the world is substantial from a number of perspectives and these verbs belong to the most complex and simultaneously central entities of human language For this reason their analysis must continually be synchronized with the newest results of general linguistic research This volume hence describes and interprets the to be verbs and constructions in the broad context of contemporary linguistic research including synchrony diachrony diatopy language contrast and typology **The academy**,1875 *Extreme Events in Geospace* Natalia Buzulukova,2017-12-01 *Extreme Events in Geospace Origins Predictability and Consequences* helps deepen the understanding description and forecasting of the complex and inter related phenomena of extreme space weather events Composed of chapters written by representatives from many different institutions and fields of space research the book offers discussions ranging from definitions and historical knowledge to operational issues and methods of analysis Given that extremes in ionizing radiation ionospheric irregularities and geomagnetically induced currents may have the potential to disrupt our technologies or pose danger to human health it is increasingly important to synthesize the information available on not only those consequences but also the origins and predictability of such events *Extreme Events in Geospace Origins Predictability and Consequences* is a valuable source for providing the latest research for geophysicists and space weather scientists as well as industries impacted by space weather events including GNSS satellites and radio communication power grids aviation and human spaceflight The list of first second authors includes M Hapgood N Gopalswamy K D Leka G Barnes Yu Yermolaev P Riley S Sharma G Lakhina B Tsurutani C Ngwira A Pulkkinen J Love P Bedrosian N Buzulukova M Sitnov W Denig M Panasyuk R Hajra D Ferguson S Lai L Narici K Tobiska G Gapirov A Mannucci T Fuller Rowell X Yue G Crowley R Redmon V Airapetian D Boteler M MacAlester S Worman D Neudegg and M Ishii Helps to define extremes in space weather and describes existing methods of analysis Discusses current scientific understanding of these events and outlines future challenges Considers the ways in which space weather may affect daily life Demonstrates deep connections between astrophysics heliophysics and space weather applications including a discussion of extreme space weather events from the past Examines national and space policy issues concerning space weather in Australia Canada Japan the United Kingdom and the United States **The Cultural Revolution in the Foreign Ministry of China** Ma Jisen,2020-06-15 The Cultural Revolution which occurred between 1966 and 1976 was a major unforgettable event in modern Chinese history For more than thirty years the prevalent view of the Cultural Revolution in the Chinese Foreign Ministry has been that the rebels controlled the Foreign Ministry in August 1967 and caused the many excesses in foreign affairs such as the burning of the British mission in Beijing which isolated China from the rest of the world The author of this book challenges this point of view The book gives a factual account of the course of the ten year Cultural Revolution in the Foreign Ministry based on documents issued during the Cultural Revolution talks by Zhou Enlai and Chen Yi and the manuscripts of the people concerned as well as interviews with Foreign Ministry staff members who personally took part in the events
