Oeuvres De Jules Ferry:

Culture Wars and Literature in the French Third Republic Gilbert D. Chaitin, 2009-03-26 The articles assembled in *Culture Wars and Literature in the French Third Republic* describe and analyze the ever widening attempts in the early years of the Third Republic 1870 1914 to mobilize literary phenomena for the purposes of political and social warfare Literature became the preferred site in which the human implications of the fiercest and most widespread of these culture wars the battles over national identity waged between proponents of secular and religious education were articulated dramatized and appraised In studies of Erckmann Chatrian and Vall s Rachilde and Colette the Goncourt brothers and Marcelle Tinayre La Fontaine and Corneille the song writer Jules Jouy and the theater critic Francisque Sarcey among others some of these essays open up new perspectives on well known issues such as education the definition of national classics Boulangism and women s liberation while others bring to light hitherto unsuspected connections between apparently disparate problems like decadence anarchism and feminism the mystery of literariness and the ban on Muslim headscarves or the posthumous publication of private letters and the State s interest in cultural and literary heroes The final piece crystallizes the fundamental conflict of democratization the tension between the republican desire for popular participation and the fear of the consequences of that participation by an uncultured public

Schooling and the Making of Citizens in the Long Nineteenth Century Daniel Tröhler, Thomas S. Popkewitz, David F. Labaree, 2011-05-09 This book is a comparative history that explores the social cultural and political formation of the modern nation through the construction of public schooling It asks how modern school systems arose in a variety of different republics and non republics across four continents during the period from the late eighteenth century to the early twentieth century The authors begin with the republican preoccupation with civic virtue the need to overcome self interest in order to take up the common interest which requires a form of education that can produce individuals who are capable of self guided rational action for the public good They then ask how these educational preoccupations led to the emergence of modern school systems in a disparate array of national contexts even those that were not republican By examining historical changes in republicanism across time and space the authors explore central epistemologies that connect the modern individual to community and citizenship through the medium of schooling Ideas of the individual were reformulated in the nineteenth century in reaction to new ideas about justice social order and progress and the organization and pedagogy of the school turned these changes into a way to transform the self into the citizen

The Spectator , 1889 Intellectual Founders of the Republic Sudhir Hazareesingh, 2001-11 This innovative study of French political culture re examines the origins of modern republicanism through the lives and political thought of five nineteenth century intellectuals Jules Barni Charles Dupont White Emile Littr Eug ne Pelletan and Etienne Vacherot By their writings and their political practices at the local national international levels these thinkers made major contributions to the founding of the new republican order in France Drawing on a range of archival and published sources the

book sheds new light on classical republican thinking on such key issues as the interpretation of the 1789 Revolution the definition of citizenship the meaning of patriotism the relationship between central government and local democracy the value of individual liberty and the place of education and religion in publica and private life These five studies also break new ground in the conceptualization of nineteenth century French intellectual history The writings of these thinkers demonstrate the ideological pluralism and diversity of moderate French republican thought during this period Positivism appears as an important and influential doctrine but its hegemonic aspirations were successfully resisted by the abiding influences of Saint Simonism socialism doctrinaire liberalism and neo Kantianism It emerges that the ideological potency of republican doctrine lay in its complexity and sophistication as reflected in its capacity to effect a synthesis among these different approaches Through its analysis of the writings and political practices of these five thinkers Intellectual Founders of the Republic offers critical insights into the history of political thought as well as modern French republicanism It underlines both the significance of contextuality in the interpretation of political discourse and the continuing relevance of classical republicanism in making sense of contemporary moral and political dilemmas The International Blue Book ,1910
