Crisis Rhetoric and Policy Change in China Yihong Liu, 2022-01-13 This book explores how China's political system responds to crisis. A crisis is an episode whose impact cannot be controlled merely by astute on the ground incident management, particularly in cases involving widespread doubt about the legitimacy of established policy paradigms or the political order as a whole. Crisis can create political windows for advocacy groups challenging established policies in pluralist democracies. The political battle between competing definitions of an uncertain and ambiguous situation among the various actors provides them with crisis induced opportunity space for dramatic policy change. However, the process of crisis induced policy change, mainly by crisis framing in non-west regimes like China, has not been adequately addressed. As China's leadership foregrounds legitimacy in victory over COVID-19 and a new era of climate change disasters begins, this dynamic model of crisis and recuperation will offer food for thought for scholars of Chinese and global politics.

China's Relations with Africa Joshua Eisenman, David H. Shinn, 2023-08-01 Since Xi Jinping's accession to power in 2012, nearly every aspect of China's relations with Africa has grown dramatically. Beijing has increased the share of resources it devotes to African countries, expanding military cooperation, technological investment and educational and cultural programs, as well as extending its political influence. This book examines the full scope of contemporary political and security relations between China and Africa. David H. Shinn and Joshua Eisenman not only explain the specific tactics and methods that Beijing uses to build its strategic relations with African political and military elites but also contextualize and interpret them within China's larger geostrategy. They argue that the priorities of Chinese leaders, including the conflation of threats to the Communist Party with threats to the country, a growing emphasis on relations in the Global South and a focus on countering U.S. hegemony, have combined to elevate Africa's importance among policy makers in Beijing. Ranging from diplomacy and propaganda to arms sales and space cooperation, from increasingly frequent People's Liberation Army Navy port calls in Africa to the rising number of African students

studying in China this book marshals extensive and compelling qualitative and quantitative evidence of the deepening ties between China and Africa Drawing on two decades of systematic data and hundreds of surveys and in person interviews Shinn and Eisenman shed new light on the state of China Africa relations today and consider what the future may hold
