3. About the Pedometer

Number of Aerobic steps displayed

Besides a regular step counter, the Walking style also features an aerobic step counter, which counts the number of steady steps. Steady – or aerobic – steps is the physical exercise that helps us stay healthy. Steady steps are counted separately when walking more than 50 steps per minute and more than 10 minutes successively. If a rest of less than 1 minute is taken after a continuous walk of more than 10 minutes, this will be regarded as part of “continuous (aerobic or steady) walk”.

How many steps do we need to do per day?

For long term health and reduced chronic disease risk, we should do 10,000 steps a day. For successful weight loss, this should be between 12,000 and 15,000 steps. If we want to build aerobic fitness, we should make at least 3,000 (preferably more) steady steps per day.

The Walking style helps you manage your steps. Simply wear the Walking style Step Counter and it will count all your daily steps. It's easy to use: just set it and start moving (as stated by David R. Bassett Jr., a professor in the Department of Health and Exercise Science at the University of Tennessee, Knoxville).

Example: $\frac{5.5 \text{ m (total distance)}}{10 \text{ (number of steps)}} = 0.55 \text{ m (55 cm)}$
