a wicked short

A man and a woman are shown in a romantic embrace. The woman, with long dark hair, is wearing a red dress and has her hand on the man's chest. The man, with short dark hair, is wearing a black suit over a pink shirt. They are positioned in the center of the frame. The background is a dark, moody city skyline at night, with lights from buildings visible. The overall color palette is dominated by deep reds, blacks, and greys, with some highlights from the city lights and the couple's clothing.

and philosophers believers and nonbelievers artists and scientists have tried to make sense of our existence by suggesting that everything is connected that a mysterious Oneness binds us to everything else People go to temples churches mosques and synagogues to pray to their divine incarnation of Oneness Following a surprisingly similar notion scientists have long asserted that under Nature s apparent complexity there is a simpler underlying reality In its modern incarnation this Theory

of Everything would unite the physical laws governing very large bodies Einstein's theory of relativity and those governing tiny ones quantum mechanics into a single framework But despite the brave efforts of many powerful minds the Theory of Everything remains elusive It turns out that the universe is not elegant It is gloriously messy Overturning more than twenty five centuries of scientific thought award winning physicist Marcelo Gleiser argues that this quest for a Theory of Everything is fundamentally misguided and he explains the volcanic implications this ideological shift has for humankind All the evidence points to a scenario in which everything emerges from fundamental imperfections primordial asymmetries in matter and time cataclysmic accidents in Earth's early life and duplication errors in the genetic code Imbalance spurs creation Without asymmetries and imperfections the universe would be filled with nothing but smooth radiation A Tear at the Edge of Creation calls for nothing less than a new humancentrism to reflect our position in the universal order All life but intelligent life in particular is a rare and precious accident Our presence here has no meaning outside of itself but it does have meaning The unplanned complexity of humankind is all the more beautiful for its improbability It's time for science to let go of the old aesthetic that labels perfection beautiful and holds that beauty is truth It's time to look at the evidence without centuries of monotheistic baggage In this lucid down to earth narrative Gleiser walks us through the basic and cutting edge science that fueled his own transformation from unifier to doubter a fascinating scientific quest that led him to a new understanding of what it is to be human
