Pevehouse, 2014-12-22 Time series or longitudinal data are ubiquitous in the social sciences Unfortunately analysts often treat the time series properties of their data as a nuisance rather than a substantively meaningful dynamic process to be modeled and interpreted Time Series Analysis for the Social Sciences provides accessible up to date instruction and examples of the core methods in time series econometrics Janet M Box Steffensmeier John R Freeman Jon C Pevehouse and Matthew P Hitt cover a wide range of topics including ARIMA models time series regression unit root diagnosis vector autoregressive models error correction models intervention models fractional integration ARCH models structural breaks and forecasting This book is aimed at researchers and graduate students who have taken at least one course in multivariate regression Examples are drawn from several areas of social science including political behavior elections international conflict criminology and comparative political economy

**Maximum Likelihood for Social Science** Michael D. Ward, John S. Ahlquist, 2018-11-15 This volume provides a practical introduction to the method of maximum likelihood as used in social science research Ward and Ahlquist focus on applied computation in R and use real social science data from actual published research Unique among books at this level it develops simulation based tools for model evaluation and selection alongside statistical inference The book covers standard models for categorical data as well as counts duration data and strategies for dealing with data missingness By working through examples math and code the authors build an understanding about the contexts in which maximum likelihood methods are useful and develop skills in translating mathematical statements into executable computer code Readers will not only be taught to use likelihood based tools and generate meaningful interpretations but they will also acquire a solid foundation for continued study of more advanced statistical techniques

Morgan,Christopher Winship,2014-11-17 In this second edition of Counterfactuals and Causal Inference completely revised and expanded the essential features of the counterfactual approach to observational data analysis are presented with examples from the social demographic and health sciences Alternative estimation techniques are first introduced using both the potential outcome model and causal graphs after which conditioning techniques such as matching and regression are presented from a potential outcomes perspective For research scenarios in which important determinants of causal exposure are unobserved alternative techniques such as instrumental variable estimators longitudinal methods and estimation via causal mechanisms are then presented The importance of causal effect heterogeneity is stressed throughout the book and the need for deep causal explanation via mechanisms is discussed **Formal Models of Domestic Politics** Scott Gehlbach,2021-09-30 Formal Models of Domestic Politics offers a unified and accessible approach to canonical and important new models of politics Intended for political science and economics students who have already taken a course in game theory this new edition retains the widely appreciated pedagogic approach of the first edition Coverage has been expanded to include a new chapter on nondemocracy new material on valence and issue ownership dynamic veto and legislative bargaining delegation to leaders by imperfectly informed politicians and voter competence and numerous additional exercises Political economists comparativists and Americanists will all find models in the text central to their research interests This leading graduate textbook assumes no mathematical knowledge beyond basic calculus with an emphasis placed on clarity of presentation Political scientists will appreciate the simplification of economic environments to focus on the political logic of models economists will discover many important models published outside of their discipline and both instructors and students will value the classroom tested exercises This is a vital update to a classic text **Enabling the Iranian Gas Export Options** Maximilian Kuhn,2014-01-17 Maximilian Kuhn investigates one of the most pressing yet neglected subjects in the field of global energy politics the integration of the Iranian gas market Possessing the world's second largest proven natural gas reserves Iran is a hypothetical energy giant in waiting Yet over three decades of internal divisions coupled with crippling international sanctions have left Iran unable to capitalize on its vast energy potential Increasing global demand for natural gas and a government in constant need of finding new sources of revenue to meet the

needs of a fast growing population should lead Iran to eventually become a large scale gas exporter How this could take place and what the implications for global gas markets would be are the central research questions tackled by this study The study allows a look beyond international politics Iranian political decision making investment laws and pipeline games
