

3. Marking points

3.1 Marking of lists

This applies to questions requiring a set number of responses, but for which students have provided extra responses. The general principle to be followed in such a situation is that 'right + wrong = wrong'.

Each error / contradiction negates each correct response. So, if the number of errors / contradictions equals or exceeds the number of marks available for the question, no marks can be awarded.

However, responses considered to be neutral (indicated as * in example 1) are not penalised.

Example 1: What is the pH of an acidic solution?

[1 mark]

Student	Response	Marks awarded
1	green, 5	0
2	red*, 5	1
3	red*, 8	0

Example 2: Name two magnetic materials.

[2 marks]

Student	Response	Marks awarded
1	iron, steel, aluminium, copper	0

3.2 Marking of questions requiring a list

For questions requiring a specified number of responses, students may give a response that is correct, or may give a response that is incorrect. If a student gives a response that is incorrect, the mark for the question is lost. If a student gives a response that is correct, the mark for the question is awarded.

3.3 Marking of questions requiring a calculation

When a question requires a calculation, students may give a correct answer, or may give an incorrect answer. If a student gives a correct answer, the mark for the question is awarded. If a student gives an incorrect answer, the mark for the question is lost.

Full marks are only awarded for a correct final answer that is shown to be correct.

3.4 Interpretation of 'or'

When a question requires a response that is correct, students may give a correct answer, or may give an incorrect answer. If a student gives a correct answer, the mark for the question is awarded.
