Nothing to Envy Barbara Demick, 2013-05-01 WINNER OF THE 2010 SAMUEL JOHNSON PRIZE FOR NON FICTION What if the world imagined by George Orwell in Nineteen Eighty four was real What if everything around you was black and white except for the red letters on propaganda signs Where spies like Orwell s thought Police studied your facial expressions during political rallies to make sure you were sincere in your

expressions and your thoughts If you couldn't turn the dials of your radio away from the government station In fact there is such a place North Korea the only country not connected to the Internet by choice Ruled over by a dictator visible only in carefully controlled images it's a mysterious even sinister country But it's also a place where 22 million people live work and dream of a different life Journalist Barbara Demick spent a decade covering North Korea's strange politics and regulations then one day she met a young woman defector Mi ran who told her about growing up there about the cinema she used to go to when the country still had electricity and about the teenage romance which blossomed there through Mi ran's story Demick glimpsed another more human side of North Korea In **Nothing to Envy** Demick re-traces the life of Mi ran and of five other North Koreans taking us into the heart of an elusive society We see her subjects fall in love nurture ambitions and struggle with survival and betrayal their stories form a haunting portrait of a bizarre society and the cost it exacts on its citizens

Nothing to Envy Barbara Demick, 2010 North Korea run by a mad dictator is cut off from the rest of the world unknown and unknowable But North Korea is also a place where ordinary people live dream and learn to survive Demick draws a powerful portrait of a bizarre society and the very real lives it affects

Gauthier, 2022-04-26 Should we humanize the world s most inhumane leaders Adolf Hitler Joseph Stalin Benito Mussolini Mao Zedong Kim Il Sung Vladimir Lenin These cruel dictators wrote their names on the pages of history in the blood of countless innocent victims Yet they themselves were once young people searching for their place in the world dealing with challenges many of us face parental authority education romance loss and doing so in ways that might be uncomfortably familiar Historian Brandon K Gauthier has created a fascinating work epic yet intimate well researched but immensely readable clear eyed and empathetic looking at the lives of these six dictators with a focus on their youths We watch Lenin s older brother executed at the hands of the Tsar s police an event that helped radicalize this overachieving high schooler We observe Stalin grappling with the death of his young beautiful wife We see Hitler s mother mourning the loss of three young children and determined that her first son to survive infancy would find his place in the world The purpose isn t to excuse or simply explain these horrible men but rather to treat them with the empathy they themselves too often lacked We may prefer to hold such lives at arm s length so as to demonize them at will but this book reminds us that these monstrous rulers were also human beings and perhaps more relatable than we d like *Korean Englishes in Transnational Contexts* Christopher J. interrogates space and territory in a turbulent present where nation state borders are porous to a few but impermeable to many It asks how these uneven and conflicted social realities are embodied in the physical and material conditions imagined produced or experienced through architecture and urbanism Drawing on historical global examples this rich collection of

essays illustrates how empires nations and cities expand their frontiers and contest boundaries but equally how borderline identities of people and places influence or expose these processes Empirical chapters covering Central Asia the Asia Pacific region the American continent Europe and the Middle East offer multiple critical insights into the ways in which our spatial imagination is contingent on border thinking on the ways of being and navigating frontiers boundaries and margins the three themes used to organise their content The underlying premise of the book is that sensitisation to border conditions can alter our understanding of the static physical spaces that service political or cultural ideologies and that the view from the periphery opens up new ways of understanding sovereignty In exploring these various spaces and their transformative subjectivities this book also reveals the unrelenting precarity of contesting and living on the margins and related spaces and discourses that are neglected or suppressed

Information Regimes During the Cold War in East Asia Jason

Morgan,2020-10-12 Morgan and his contributors develop the concept of the Information Regime as a way to understand the use abuse and control of information in East Asia during the Cold War period During the Cold War war itself was changing as was statecraft Information emerged as the most valuable commodity becoming the key component of societies across the globe This was especially true in East Asia where the military alliances forged in the wake of World War II were put to the most severe of tests These tests came in the form of adversarial relations between the United States and the Soviet Union as well as pressures within their alliances which eventually caused the People s Republic of China to break with from Moscow while Japan for a time during the 1950s and 1960s seemed poised to move away from Washington More important than military might or economic influence was the creation of information regimes swathes of territory where a paradigm ideology or political arrangement were obtained Information regimes are not necessarily state centric and many of the contributors to this book focus on examples which were not so Such a focus allows us to see that the East Asian Cold War was not really cold at all but was the epicentre of an active contentious birth of information as the defining element of human interaction This book is a valuable resource for historians of East Asia and of developments in information management in the twentieth century
