Nov 2014 Geography Question Paper November 2013:

The Road to Unfreedom Timothy Snyder, 2019-04-09 NEW YORK TIMES BESTSELLER From the author of *On Tyranny* comes a stunning new chronicle of the rise of authoritarianism from Russia to Europe and America A brilliant analysis of our time Karl Ove Knausgaard *The New Yorker* With the end of the Cold War the victory of liberal democracy seemed final Observers declared the end of history confident in a peaceful globalized future This faith was misplaced Authoritarianism returned to Russia as Vladimir Putin found fascist ideas that could be used to justify rule by the wealthy In the 2010s it has spread from east to west aided by Russian warfare in Ukraine and cyberwar in Europe and the United States Russia found allies among nationalists oligarchs and radicals everywhere and its drive to dissolve Western institutions states and values found resonance within the West itself The rise of populism the British vote against the EU and the election of Donald Trump were all Russian goals but their achievement reveals the vulnerability of Western societies In this forceful and unsparing work of contemporary history based on vast research as well as personal reporting Snyder goes beyond the headlines to expose the true nature of the threat to democracy and law To understand the challenge is to see and perhaps renew the fundamental political virtues offered by tradition and demanded by the future By revealing the stark choices before us between equality or oligarchy individuality or totality truth and falsehood Snyder restores our understanding of the basis of our way of life offering a way forward in a time of terrible uncertainty

Adaptive Water Management Farideh Delavari Edalat, M. Reza Abdi, 2017-09-05 This book explores a new framework of Adaptive Water Management AWM for evaluating existing approaches in urban water management It highlights the need to adopt multidisciplinary strategies in water management while providing an in depth understanding of institutional interactions amongst different water related sectors The key characteristics of AWM i e polycentric governance organisational flexibility and public participation are investigated and described through a critical review of the relevant literature The book presents an empirical case study undertaken in a selected developing country city to investigate the potential gaps between the current water management approaches and possible implementation of AWM Feasibility of AWM operations is examined in an environment surrounded by established water management structure with centralised governance and an institutional process based on technical flexibility The key elements of AWM performance are re structured and transformed into decision support systems Multi criteria decision models are developed to facilitate quantification and visualization of the elements derived from the case study which is involved with water companies and water consumers The book describes how the concept of AWM along with structuring suitable decision support systems can be developed and applied to developing country cities The book highlights the barriers for applying the AWM strategies that include established centralised decision making bureaucratic interactions with external organisations lack of organisational flexibility within the institutions and lack of recognition of public role in water management The findings outline that despite the lack of adaptability in the current water management in the case study as

an example of developing countries there are positive attitudes among water professionals and the public towards adaptability through public institutional participation
