The decisions we make about energy shape our present and our future From geopolitical tension to environmental degradation and an increasingly unstable climate these choices infiltrate the very air we breathe Energy security politics has direct impact on the continued survival of human life as we know it and the earth cannot survive if we continue consuming fossil energy at current rates The low carbon transition is simply not happening fast enough and change is unlikely without a radical change in how we approach energy security But thinking on energy security has failed to keep up with these changing realities Energy security is primarily considered to be about the availability of reliable and affordable energy supplies having enough energy and it remains closely linked to national security The Energy Security Paradox looks at contemporary energy security politics in the United States and China the top two energy consumers and producers Based on in depth empirical analysis it demonstrates that current energy security practices actually lead to a security paradox they produce insecurity To illustrate this it develops the energy security paradox as a framework for understanding the interconnected insecurities produced by current practices However it also goes beyond this examining resistance to current practices to highlight that we not only can do energy security differently this is already happening In the process the volume demonstrates that the value of security depends on the context Based on this The Energy Security Paradox proposes a radical reconsideration of how we approach and practice energy security Japan's Foreign Aid to Africa Pedro Amakasu

Raposo,2013-09-05 The Tokyo International Conference on African Development TICAD was established in 1993 with the intention of creating opportunities for trade and investment on both sides and the promotion of sustainable development In 2003 the conference translated Japanese aid policy to Africa into three key pillars human centered development poverty reduction through economic growth and the consolidation of peace and since 2005 Africa has on several occasions been the largest recipient of Japanese overseas aid Tracing Japanese foreign aid to Africa during and after the Cold War this book examines how the TICAD process sits at the intersection of international relations and domestic decision making Indeed it questions whether the increase in aid has been driven by domestic changes such as demands from civil society and donor interest or pressures emanating from the international system Taking Angola and Mozambique as case studies the book explores how Japan s development cooperation with Africa has assisted previously war torn states make the transition from

war to peace and in doing so demonstrates the centrality of human security to Japanese foreign policy as a means of ensuring sustainable development This book will have great interdisciplinary appeal to students and scholars of Japanese and African studies Japanese politics international relations theory foreign policy economic development and sustainable development

South Korea at the Crossroads Scott A. Snyder, 2018-01-02 Against the backdrop of China s mounting influence and North Korea s growing nuclear capability and expanding missile arsenal South Korea faces a set of strategic choices that will

shape its economic prospects and national security In South Korea at the Crossroads Scott A Snyder examines the trajectory of fifty years of South Korean foreign policy and offers predictions and a prescription for the future Pairing a historical perspective with a shrewd understanding of today s political landscape Snyder contends that South Korea s best strategy remains investing in a robust alliance with the United States Snyder begins with South Korea s effort in the 1960s to offset the risk of abandonment by the United States during the Vietnam War and the subsequent crisis in the alliance during the 1970s A series of shifts in South Korean foreign relations followed the Nordpolitik engagement with the Soviet Union and China at the end of the Cold War Kim Dae Jung s Sunshine Policy designed to bring North Korea into the international community trustpolitik which sought to foster diplomacy with North Korea and Japan and changes in South Korea s relationship with the United States Despite its rise as a leader in international financial development and climate change forums South Korea will likely still require the commitment of the United States to guarantee its security Although China is a tempting option Snyder argues that only the United States is both credible and capable in this role South Korea remains vulnerable relative to other regional powers in northeast Asia despite its rising profile as a middle power and it must balance the contradiction of desirable autonomy and necessary alliance
