Decolonization and Conflict Martin Thomas, Gareth Curless, 2017-06-15 Insurgency based irregular warfare typifies armed conflict in the post Cold War age For some years now western and other governments have struggled to contend with ideologically driven guerrilla movements religiously inspired militias and systematic targeting of civilian populations Numerous conflicts of this type are rooted in experiences of empire breakdown Yet few multi empire studies of decolonisation s violence exist Decolonization and Conflict brings together expertise on a variety of different cases to offer new perspectives on the colonial conflicts that engulfed Europe s empires after 1945 The contributors analyse multiple forms of colonial counter insurgency from the military engagement of anti colonial movements to the forced removal of civilian populations and the application of new doctrines of psychological warfare Contributors to the collection also show how insurgencies their propaganda and methods of action were inherently transnational and inter connected The resulting study is a vital contribution to our understanding of contested decolonization It emphasises the global connections at work and reveals the contemporary resonances of both anti colonial insurgencies and the means devised to counter them It is essential reading for students and scholars of empire decolonization and asymmetric warfare

European Economy, 2012

Integrating Food into Urban Planning Yves Cabannes, Cecilia Marocchino, 2018-11-22 The integration of food into urban planning is a crucial and emerging topic Urban planners alongside the local and regional authorities that have traditionally been less engaged in food related issues are now asked to take a central and active part in understanding how food is produced processed packaged transported marketed consumed disposed of and recycled in our cities While there is a growing body of literature on the topic the issue of planning cities in such a way they will increase food security and nutrition not only for the affluent sections of society but primarily for the poor is much less discussed and much less informed

by practices This volume a collaboration between the Bartlett Development Planning Unit at UCL and the Food Agricultural Organisation aims to fill this gap by putting more than 20 city based experiences in perspective including studies from Toronto New York City Portland and Providence in North America Milan in Europe and Cape Town in Africa Belo Horizonte and Lima in South America and in Asia Bangkok and Tokyo By studying and comparing cities of different sizes from both the Global North and South in developed and developing regions the contributors collectively argue for the importance and circulation of global knowledge rooted in local food planning practices programmes and policies

Sticky Power Daniel Haberly,Dariusz Wójcik,2022-05-02 This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations Although modern civilization revolves around money the nature of money is paradoxical It is nothing more than a representation of and medium for decentralized networks of social trust but its production is controlled by highly centralized networks of firms places and governments and there is never enough of it to go around Moreover given that the creation of money as credit is based on expectations money is at its heart an instrument for human agency to change the future However the financial systems that produce money are deeply rooted in the past and perpetuate themselves through history Sticky Power seeks to deepen our understanding of the paradox of money by introducing a novel conceptual lens Global Financial Networks to cast new light on the geography history politics and sociology of finance from the Middle Ages to the global financial crisis and beyond It shows that the power of finance is inherently sticky apparently new innovations such as offshore finance actually date back centuries and global financial networks more broadly have adapted to the rise and fall of empires and the development of new technologies while changing surprisingly little in their basic character or at most changing very slowly

Haberly and Wjick argue that a recognition of the mechanics of this durability calls for a new approach to reforming finance one less reactively focused on regulation and more proactively focused on building new institutional systems with a long term sticky power of their own
