*Progress, Change and Development in Early Childhood Education and Care* Elizabeth Coates, Dorothy Faulkner, 2017-10-02 In 2000 the Millennium Development Goals set out targets aimed at creating a safer more prosperous and more equitable world If these goals were to be achieved children's lives would indeed be transformed In this collection achievements against these targets are identified with each contributor examining the progress made in early years provision in Australia China England Greece the Netherlands Portugal South Africa and Sweden They highlight the priorities and agendas of their respective governments and focus on the trends and issues which are particularly relevant to each situation thereby revealing the social and educational inequalities that persist across countries A common theme running through this volume concerns the political tensions that arise when governments and educators hold fundamentally different views about the nature and purpose of early years education and the needs of children and families It is clear that although the past two decades have seen many changes in attitude towards the importance of the early years of life politically economically and environmentally much still remains to be done if the Millennium Development Goals for young children and their families are to be fully met Despite this this volume

Guérois,Gastor Mapunda,Lutz Marten,2024-02-19 The approximately 500 Bantu languages spoken across vast areas of Central Eastern and Southern Africa are united by the presence of a number of broad typological similarities including for example complex noun class system and agglutinative verbal morphology However the languages also exhibit a high degree of micro variation Recent work has demonstrated fine grained morphosyntactic variation across many Bantu languages focusing on grammatical topics such as double object constructions inversion constructions or object marking adopting formal comparative and typological perspectives Continuing in this vein this volume builds on the momentum of the dynamic

field of morphosyntactic variation in Bantu and contributes to the growing body of work which examines morphosyntactic variation with a regional focus on the Bantu languages of East Africa The East African region is characterized by high linguistic complexity in terms of the number of languages spoken in terms of the four different linguistic phyla present and in terms of the inherent sociolinguistic dynamics The current volume explores this complexity further by bringing together studies which investigate features of morphosyntax of an individual language as well as those which develop an in depth examination of a single morphosyntactic phenomena in a small sample of languages The book seeks also to add to the descriptive status of the languages under examination as well as raising questions relating to language language contact language change and micro variation in related languages spoken in close geographic proximity **Handbook of**
