hundreds of thousands of members and billions of dollars in revenue From Hong Kong to New York these vast organizations spread their tentacles into politics finance and everyday life Criminologist Federico Varese draws on a lifetime s research to give us access to some of the world s most secretive societies Mixing reportage with case studies and historical insights this is the story of mafia as it really is filled with boredom and drama death and disaster ambition and betrayal **The Syrian**

Jihad Charles R. Lister,2016-01-02 The eruption of the anti Assad revolution in Syria has had many unintended consequences among which is the opportunity it offered Sunni jihadists to establish a foothold in the heart of the Middle East That Syria s ongoing civil war is so brutal and protracted has only compounded the situation as have developments in Iraq and Lebanon Ranging across the battlefields and international borders have been dozens of jihadi Islamist fighting groups of which some coalesced into significant factions such as Jabhat al Nusra and the Islamic State This book assesses and explains the emergence since 2011 of Sunni jihadist organizations in Syria s fledgling insurgency charts their evolution and situates them within the global Islamist project Unprecedented numbers of foreign fighters have joined such groups who will almost certainly continue to host them Thus external factors in their emergence are scrutinized including the strategic and tactical lessons learned from other jihadist conflict zones and the complex interplay between Al Qaeda and the Islamic State and how it has influenced the jihadist sphere in Syria Tensions between and conflict within such groups also feature in this indispensable volume *Sustainable Rural Transformation Through Agro-Industries* U.K. Srivastava,Pramila

Srivastava,2018-01-01 Indian economy is undergoing structural changes The share of agriculture and allied activities in GDP has declined over the years On farm Jobs are diminishing or stagnant There is a need to generate off farm jobs through secondary and tertiary processing of agriculture crop horticulture animal husbandry fisheries forest produce raw material and these are not increasing to keep pace with the needs despite potential In India more than 75% of agro processing is done by informal and small enterprises But most informal and small unit suffer from market and technology constraints Therefore they cannot go for higher value addition from the main products and from the by products These informal and small enterprises are not in a position to create an integrated value chain which can have links with the farmers As technology is outmoded these units are not in a position to give quality assurance and meet food safety standards Their products are marketed only in less demanding nearby local markets World over there is transition from informal and small agro industrial enterprises to large units which are competitive in terms of price and quality equitable not exploiting any member of value chain and inclusive treating farmers as strategic business partners rather than adversaries They use latest and innovative technology and have national and international markets for selling their products They enjoy scale economies are able to comply with national and international standards of quality assurance and go for higher level of value addition They can forge linkages with the farmers through contract farming and direct procurement and assure their raw material supply by treating the farmers as strategic business partners But these enterprises require the enabling conditions which make it

possible to run the enterprises profitably along with transformation of rural areas Over the years the Government of India and nearly all the State Governments have now created most attractive enabling environment Therefore in our assessment India is poised for a great leap in investments in food processing and marketing The book contains 18 chapters dealing with the entire project cycle of agro industries for sustainable rural transformation The most insightful part is the 12 real life case studies The book would be useful to agro entrepreneurs agro processing industries policy makers bankers management consultants students of agriculture universities cooperative management training institutions and MBA students
