related professions who can provide valuable insights This guide is divided into ten chapters each of them covering an important step along a premed s journey While this book has a focus on North America we have written this guide with a global audience in mind as many of the concepts discussed are relevant to any medical school application process As such although the key components of the application process to medical school remain the same across various training systems not every chapter will be equally relevant to every reader Typically an application is composed of academic performance volunteer activities research projects medical college admission test performance and extracurricular activities We have combined the prescriptive style of most books of this type with detailed stories of how real people navigated their personal journeys to reach successful outcomes This guide shares a broad range of perspectives on what it takes and means to be a physician We are more convinced than ever that amongst applicants who have the academic credentials those who seek mentors and network early within the profession be it through family or friend circles and those who learn from their mistakes are accepted earlier This book will help you in that journey towards medical school acceptance and an exciting career in medicine Jiayi Hu MD Manveen Puri MD CCFP Sameer Masood MD Aly Madhavji CPA CA CMA CIM *A Faculty Guide to Advising and Supervising Graduate Students* Darla J.
