Omero Nel Baltico Di Felice Vinci:

Geographies of Myth and Places of Identity Marco Benoît Carbone, 2022-01-13 Turning to a region of South Italy associated with Greater Greece and the geographies of Homer's Odyssey Marco Benoit Carbone delivers a historical and ethnographic treatment of how places defined in public imagination and media by their associated histories become sites of memory and identity as their landscape and mythologies turn into insignia of a romanticised antiquity For the ancient Greeks Homer had set the marine monsters of the Odyssey in the Strait between Calabria and Sicily Since then this passage has been glowing with the aura of its mythological landmarks Travellers and tourists have played Odysseus by re-enacting his journey Scholars and explorers have explained the myths as metaphors of whirlpools and marine fauna The iconic Strait and village of Scilla have turned into place myths and playgrounds defined by the region's heritage Carbone observes the enduring impact of Hellas on the real Strait today The continuous rekindling of cultural and visual traditions of place in the arts media travel and tourism have intersected with philhellenic historiographies shaping local policies public histories views of development and forms of Hellenicist identitarianism Elements of society have celebrated the landscape of the Odyssey appropriated Homer as their imagined heirs and purported themselves as the original Europeans pandering to outdated ideological appropriations of classical antiquity and exclusionary West-centric views of the Mediterranean [The Baltic Origins of Homer's Epic Tales](#) Felice Vinci, 2005-12-20 Compelling evidence that the events of Homer's Iliad and Odyssey took place in the Baltic and not the Mediterranean Reveals how a climate change forced the migration of a people and their myth to ancient Greece Identifies the true geographic sites of Troy and Ithaca in the Baltic Sea and Calypso's Isle in the North Atlantic Ocean For years scholars have debated the incongruities in Homer's Iliad and Odyssey given that his descriptions are at odds with the geography of the areas he purportedly describes Inspired by Plutarch's remark that Calypso's Isle was only five days sailing from Britain Felice Vinci convincingly argues that Homer's epic tales originated not in the Mediterranean but in the northern Baltic Sea Using meticulous geographical analysis Vinci shows that many Homeric places such as Troy and Ithaca can still be identified in the geographic landscape of the Baltic He explains how the dense foggy weather described by Ulysses befits northern not Mediterranean climes and how battles lasting through the night would easily have been possible in the long days of the Baltic summer Vinci's meteorological analysis reveals how a decline of the climatic optimum caused the blond seafarers to migrate south to warmer climates where they rebuilt their original world in the Mediterranean Through many generations the memory of the heroic age and the feats performed by their ancestors in their lost homeland was preserved and handed down to the following ages only later to be codified by Homer in the Iliad and the Odyssey Felice Vinci offers a key to open many doors that allow us to consider the age-old question of the Indo-European diaspora and the origin of the Greek civilization from a new perspective **Omero nel Baltico** Felice Vinci, 1998
